Kohl Reportedly Will Appoint NATO Aide to Intelligence Post

BONN — Chancellor Helmut Kohl will replace West Germany's intelligence chief, who is under attack because of a growing spy scandal, with Bonn's ambassador to the North Atlantic Treaty Organization, Hans-Georg Wieck, government sources said Wednesday.

[In an interview broadcast by West German television Wednesday night, Heribert Hellenbroich Confirmed his dismissal The Asso-

confirmed his dismissal, The Asso-ciated-Bress reported. "The deci-sion has been taken," Mr. Hellenbroich said. "As a civil servant, 1 have to accept it."
[He insisted that he had legiti-

mate reasons for his handling of the case of Hans Joachim Tiedge, the top counterspy who defected to East Germany last week. "Unfortunately I cannot disclose the reasons that determined my actions," Mr. Hellenbroich said. "This for me a very bitter, painful experience."

Meanwhile, the affair appeared to be spreading beyond West Germany's borders with arrests of suspected East German agents in Switzerland and Britain.

Mr. Kohl's office announced that the chancellor had been given a detailed report on the defection of Mr. Tiedge, and the chancellor's decision is to be announced Thurs-

Mr. Tiedge worked, would be given

In addition, sources in Bonn said that West German investigators were looking into a new case involving the close friend of a counterintelligence official.

They said the official reported that while on a joint vacation in Austria the friend introduced him to an East German agent, who had tried to persuade him to defect.

The West German alerted the Austrian police, and later both the friend and the East German disap-

The sources, who said the case was being taken very seriously, would not name the people involved. They indicated that the incident took place this week.

Apart from the defection of Mr. Tiedge, the West German espio-They said Mr. Hellenbroich, who nage scandal has involved the exposure of four suspected East German agents in Bonn, two of them ernment officials.

Swiss police announced Wednes day they had seized a couple living in the canton of Lucerne on suspicion of being East German agents, after receiving a tip from West Ger-man counterintelligence.

in Britain, an East German couple, Reinhard and Sonja Schulze, appeared in a London court on spying charges.

Security sources in Bonn said the London arrests were linked to Mr. Tiedge's defection.

The sources refused to comment on whether the West Germans had derted London about the couple or if British counterespionage services had been aware that Mr. Tiedge knew of the case and feared the couple would be warned they were

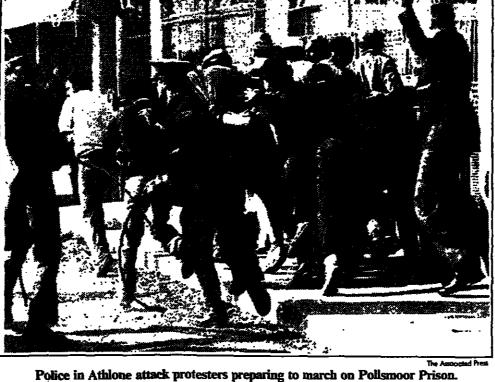

Mr. Tiedge was head of counterspy work against East German agents, and the sources said he had known of operations against suspected agents in other countries.

Mr. Hellenbroich was head of the office for two years until he was promoted to take charge of the secret service on Aug. 1.

He has admitted he was aware that Mr. Tiedge, 48, had severe al-cohol and debt problems, but he said he believed he would be a greater security risk if he were removed from his post.

In a statement on Wednesday, Mr. Kohl ordered Interior Minister Friedrich Zimmermann to take measures to improve the organization and working methods of the counterintelligence organization.

The statement said Mr. Kohl had informed President Richard von Weizsäcker about the affair. The president's approval is required for the dismissal of high-ranking gov-

Pretoria Seeks Huge Cash-Gold Swap As Many Banks Call in Their Credits

African central bank officials were fion. reported Wednesday to be attempting to work out a huge gold-for-currency swap to stabilize the rand and meet a flood of loan calls from international banks concerned

about growing social and financial

According to government and central bank sources, a swap of more than \$1 billion is being negotiated with banks in several countries, principally Switzerland and West Germany. Such swaps, which

South Africa has negotiated before, JOHANNESBURG - South essentially are loans backed by bul-

> - Buoyed by the reports, the price of gold surged more than \$5 an ounce Wednesday, to \$340.90 at the afternoon fix in London, its highest level of the year. Platinum, of which South Africa is the world's niggest supplier, surged more than \$8 an ounce, to \$340.50.

> The reported negotiations come one day after South Africa, citing "abnormal pressure" on the nation's economy, suspended trading on the Johannesburg Stock Exchange and foreign-currency marlowed a four-cent plunge in the value of the rand Tuesday, to 35.45 U.S. cents, a record low.

> Economists said the action was an admission by Pretoria that the shift of capital out of South Africa had eached crisis proportions.

Dealers in London quoted the rand Wednesday with a 10-cent spread between buying and selling

and students. According to another report, four blacks were killed and seven police officers injured in clashes in the township of Guguletu.

The demonstrators planned to deliver a letter vowing support for Mr. Mandela, 67, leader of the outlawed African National Congress, who is serving a life sentence for

treason and sabotage.

The show of official force was described as one of the broadest in years, and followed a vow by the law and order minister, Louis Le Grange, that "stern action" would be taken to halt protests.

The government Wednesday banned the Congress of South African Students, a black organization that has played a major role in protests against racial discrimination. It was the first such move against any of the 700 affiliate groups of the United Democratic Front, which opposes apartheid.

In another development, South Africa's black miners' union said Wednesday that its members would strike five gold mines and two collieries Sunday.

Organizers of the Mandela of the EC delegation. march had hoped to stage the protest despite the arrest Tuesday of Allan Boesak, a founder of the have begun from Athlone, a township for people of mixed race.

But more than 500 police and to prevent the march to the maxim-security Pollsmoor prison. Police fired tear gas and rubber

bullets at protesters at the mixedrace University of the Western Cape campus, and used whips and tear gas when about 3,000 protesters made another attempt to march from Athlone.

Seven other persons were arrested when they linked arms in a silent protest outside Pollsmoor.

About 5,000 white students were stopped from marching from the white campus of the University of Cape Town toward Polismoor. Mr. Boesak, head of the World Alliance of Reformed Churches

cratic Front, was arrested Tuesday after urging marchers to turn out for the Mandela demonstration.

Deputy Foreign Minister Louis Nel said he was arrested under security laws that permit indefinite detention. He said Mr. Boesak. who was taken to Pretoria, could be held incommunicado for renewable periods of six months.

Mr. Boesak's detention was condemned by the United States, France, Sweden and the World Council of Churches.

Meanwhile, the way appeared clear for foreign ministers of Italy, Luxembourg and the Netherlands to visit South Africa on Friday. Foreign Minister R.F. Botha said he received an assurance from the European Community that it did not claim the right to suggest solu-

tions for South Africa's problems. The two-day fact-finding tour had appeared threatened when Mr. Botha questioned the motivations

But he said Wednesday that Foreign Minister Jacques Poos of Luxembourg had assured him that the United Democratic Front. It was to EC would not propose "formulas or time scales" for resolving South Africa's problems.

President Pieter W. Botha, on a soldiers, using tear gas and firing rare visit Tuesday to black town-rubber bullets, sealed off Athlone ships in the eastern Cape, said the government had not yet unleashed with unrest (Reuters, UPI)

Rail Guards In U.K. Vote Not to Strike

Compiled by Our Staff From Dispatches railroad brakemen have voted parrowly against going on strike after fears that industrial action would lead to a complete shutdown of train services, it was announced Wednesday.

The brakemen, or guards, voted Friday on whether to take industrial action against plans by sta-te-owned British Rail to introduce driver-only trains as an economy

This would mean that the trains would be operated by one person, dispensing with the position of

The result, announced Wednesday, showed that 4,815 guards voted against striking while 4,360 were

The decision was a blow to the executive of the National Union of Railwaymen, which had called for

The union leader, Jimmy Knapp, said the guards had been intimidated into voting against a strike.

British Rail has already dismissed 243 workers and suspended 55 for refusing to operate driveronly trains.

British Rail management, determined to press ahead with modernization plans, threatened to shut the entire railroad network if the guards approved strike action.

A vote in favor would have been a new labor challenge to the Conservative government of Prime Minister Margaret Thatcher after a 12-month coal strike that collapsed

in March. It would have given the union a mandate either to call a nationwide strike or to ban overtime.

British Rail has said that driveronly trains have already operated safely on experimental routes. It said that modern equipment, including two-way radio links, would give ample warning of trouble ahead on railroad tracks.

The union says the British signal-

ing system is obsolete. It points to a recent rise in accidents to support its case. The number of derails rose from 148 to 230 between 1981 and 1984. British Rail is planning to phase

out 1,760 guards on passenger and freight trains over five years. It has promised that there will be no enforced lay-offs.

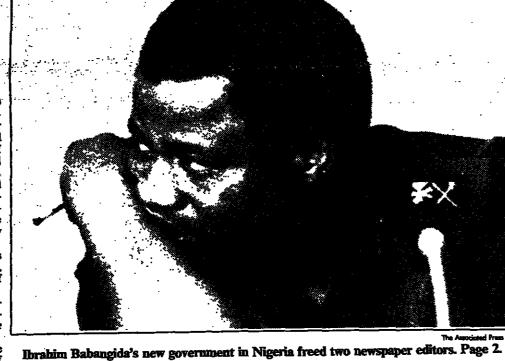

The management says that the plan would save £27 million (\$38 million) annually.

British Rail reported losses of £408 million in the 15 months to March, mostly because of work lost during the miners' strike.

The vote was the rail union's second serious defeat this year against Mrs. Thatcher's cost-cutting measures in publicly owned

In May, London subway guards industry. largely ignored a union call for a 24-hour strike.

Under legislation enacted by the Conservative government, unions must poll their members on whether to strike. The rail union has 143,000 members. (Reuters, AP)

Analysts See a More Flexible Nigeria New Ruler Expected to Seek IMF Pact, Boost Oil Output

By Bob Hagerty wernational Herald Tribu LONDON - Nigeria's new military government appears determined to relieve the country's staggering debt burden by trying to reach an agreement on a loan from

the International Monetary Fund. Bankers and businessmen who deal with the country said Wednesday that the new government, installed in a coup Tuesday, appeared likely to pursue a more flexible, pragmatic economic poseek to raise oil produc-

Though the new government had policy, these observers said more duction in subsidies for local users

because the new leaders come from the same group of conservative officers who led the former regime.

A hint of the new government's policy came in a broadcast late Tuesday by Major General Ibrahim Babangida, the new govern-ment leader. Reuters, which monitored the broadcast in Abidjan, quoted him as saying he would try to break the deadlock in talks with the IMF on Nigeria's request for a loan of about \$2.5 billion.

Those talks have stalled largely because of the Nigerian gover ment's refusal to accept the IMF's call for a sharp devaluation of the not yet clearly stated its economic naira, Nigeria's currency, and a re-

radical changes seemed unlikely of oil products. The naira is officially valued in Lagos at about \$1.12, but it recently has been worth only a fourth or a fifth as much on the black market.

seems to have diminished. Fans of Esmeralda say the program is different from the soap operas offered by Cuban stations in that it seems to carry no obvious political message.

"People are tired of the anti-Yankee programs, the programs about poverty in Latin America, illiteracy," said a woman in a management job. "They want to disconnect. They want to listen to something silly. That's why they listen to Esmeralda. It makes them

By James LeMoyne

New York Times Service
GUATEMALA CITY — The rector of the University of San Carlos here is out to set an unusual record. He would like to be the first head of the school since 1978 to survive a term in office.

But the rector, Dr. Eduardo Meyer Maldonado, is aware that it may not be an easy task. Overseeing Guatemala's national university has proved to be a high-risk occupation of late, as political violence, much of it government-directed, has swept the

The last two heads of the school were shot to death, in 1981 and 1983. Another former rector fled into exile, fearing for his life. Six weeks ago, Dr. Maldona-do's possible successor and close friend, Dr. Edgar Leiva, was also killed, shot twice while walking to a

morning class on campus.

Dr. Meyer, 47, who is a surgeon and a teacher as well as the head of the university, narrowly evaded death himself in 1983 when gunmen fired on his car, shattering a window. He escaped, he says, by ramming

his assailants' vehicle and speeding away.

"It's part of what you need to know how to do," he said with a smile, much as the president of some other college might discuss the annoying necessity of meet-ing alumni associations or attending fund-raising

The last of more than 20 death threats Dr. Meyer says he has received arrived two weeks ago. It was a missive that ended with the words, "You will pay with your life as was the case with your predecessor."

In the last two years, according to university records, at least 36 students and 10 teachers have been killed or have disappeared, 12 of them in the last six months. The police have not solved a single case, Dr. Meyer said, Several students attributed the attacks to

government security forces. The killings have increased in recent months as Guatemala prepares for elections Nov. 3 that will return it to civilian rule.

Such violence has become an accepted part of life in Guatemala, where a strongly conservative army and a Marxist guerrilla movement have warred for years and where the military appears to have killed many thousands of people in an effort to quash any challenge to

mala's military regime, a haven for young leftists and one of the few spots where the country's future is openly debated.

These activities are made easier because the university, following a long Latin American tradition, is granted a special autonomous status by the Guatemalan Constitution to encourage academic freedom. In practice, autonomy has meant that the army and the police do not openly enter the campus, though stu-dents believe that government informers, known as 'ears," are ubiquitous.

A degree of independence from the military government has also meant, according to present and former students and teachers, that underground guerrilla groups recruit on the campus and that drug dealers occasionally ply their trade there. A Roman Catholic priest said two university students he knew had recent-

briest said two university students he are what recently asked him for advice after they were approached on campus and offered scholarships to study in Cubs.

Conservative Guatemalan politicians and military officers harshly criticize the school for allowing radical leftists to organize and proselytize there. Others have been critical as well.

The U.S. ambassador to Guatemala, Alberto M. Piedra, is co-author of a book published in 1980, "Guatemala, A Promise in Peril," that dismisses the national university as "a publicly financed echo chamber of revolutionary communism.

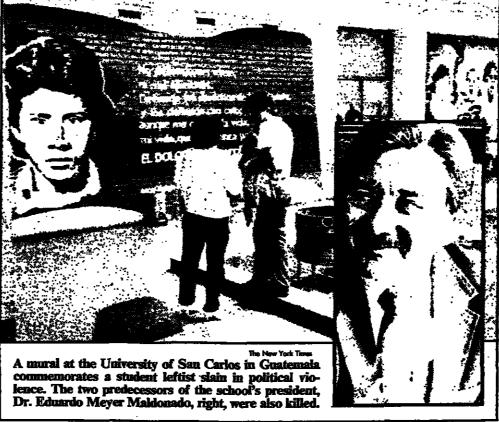

Dr. Meyer meets such criticism with the same terse ourpose he seems to devote to staying alive.

Describing himself as "of fundamentally democratic persuasion, nationalist and Catholic," he says he is determined to preserve the independence of the university founded in 1676 as Guatemala's largest center of learning. Today, it is a place where more than 50,000 middle- and working class students are educated for just \$20 a year.

His belief in the university led Dr. Meyer, who is an alumnus, to seek election as rector three years ago when nobody else wanted to risk his life for the job. His term is for four years.

"I am an idealist," he said by way of explanation, "I love the university and what I have I owe the universi-

On the broad campus grounds, radical politics and the hubbub of late adolescence offer a powerful mix of symbols and emotions.

Political slogans and invocations to action line hall-

It may be only an influential minority of students that is active in political matters, but they take the work seriously. An impromptu meeting of the association of law students gave a taste of campus politics as

practiced in Guatemala The student representatives refused to give their names, prohibited photographs and said that the number of students in the association was a secret. Pictures of eight student leaders who have been killed or have disappeared stared down from a wall.

The young politicians spoke openly of their strong leftist beliefs and their hope for a revolution. They did In the midst of the repression, the national university has become a center of political resistance to Guatebuildings depict Che Guevara and Guatemalan revonot disguise their anger with Guatemala's military

Korean Talks on Reunions Break Up

SEOUL (Reuters) — Red Cross delegates from North and South Korea, meeting to arrange the reunions of divided families, broke off talks abruptly Wednesday in Pyongyang, but officials said later that they

expected the visits to go ahead.

The talks broke up after North Korean delegates criticized the South Koreans for walking out of a gymnastics display Tuesday in Pyongyang's Moranbong stadium after 50,000 North Korean students, brandishing rifles and shouting warlike slogans, staged a mock battle. The South Korean said that the display breached a promise by North Korea to avoid a political show.

A South Korean spokesman for the Red Cross in Seoul said that North A south Korean spokesman for the Red Cross in Seoul sand that North-Korea had refused to discuss the main aims of the talks and had threatened to abandon visits in September by 100 families separated by the 1950-53 Korean War. He added that he expected the exchange visits to take place and that talks would resume Nov. 26 in Seoul.

Afghans Report Major Soviet Move

AIGNABAD, Pakistan (Reuters) — Large numbers of Soviet troops are being ferried by helicopter to eastern Afghanistan in a major anti-guerrilla offensive, Afghan rebel sources said Wednesday.

They said helicopters were seen bringing troops to Paktia and Nangar-har provinces bordering Pakistan as part of a drive to seal guerrilla supply routes into Afghanistan. Western diplomats reported Tuesday that helicopters and military convoys with hundreds of vehicles had been seen heading east from Kabul in the past week.

The Soviet Union abruptly closed its airspace near Afghanistan on Tuesday, forcing a Thai airliner to turn back to New Delhi. The move prompted speculation that it might have been done to make way for special military traffic.

Reagan Urges U.S., Soviet Arms Cuts

GENEVA (UPI) — President Ronald Reagan called Wednesday on

Moscow to join in building a stable and more cooperative relationship,

starting with radical cuts in nuclear arsenals.

The president made his appeal in a message read by Kenneth L. Adelman, the U.S. chief delegate to a conference reviewing the Nuclear Nonproliferation Treaty of 1968, which was aimed at preventing a further

spread of nuclear weapons.

In a similar message Tuesday, Mikhail S. Gorbachev, the Soviet leader, urged Washington to join Moscow's unilateral moratorium on nuclear testing and renunciation of the first use of nuclear arms.

Fires in N.Y. Tunnel Cut Rail Service

NEW YORK (AP) — Fires of suspicious origin in four junked railroad cars spewed smoke through Manhattan's Grand Central Terminal on Wednesday, cutting off commuter rail service used by 60,000 people at the height of the morning rush hour.

Dense clouds of black smoke poured into the air from ventilation ducts at the evacuated station and along Park Avenue, which sits atop the

at the evacuated station and along rank Avenue, which sats atop the tunnels leading out of the station. Emergency equipment jammed the streets and midtown traffic was badly congested.

More than 40 people, including 12 firefighters, were treated at Grand Central and 29 were sent to hospitals. Most suffered smoke inhalation or heat exhaustion. Authorities said the fire broke out in the early morning in four passenger cars scheduled to be scrapped. They were stored in a tunnel beneath the station.

Sikh Group Will Boycott Elections

NEW DELHI (Reuters) - A militant Sikh group said Wednes-day that it would boycott next month's Punjab elections, the Press Trust of India reported.

Joginder Singh said his supporters would not put up candidates in the Sept. 25 election. His hardline United Akali Dal group broke away from the main Sikii political party, the Akali Dal, in May.

A leader of the group, Ranjit Singh Brahmpura, was arrested three days ago in connection with the murder of the president of Akali Dal, Harchand Singh Longowal, by Sikh extremist gur-men Aug. 20. Jagdev Singh Tal-wandi, another United Akali Dal

leader, has been questioned by police about the assassination.

Springer Kidnapper Given 3½ Years CHUR, Switzerland (Reuters) — A 22-year-old West German was sentenced Wednesday to three and a half years in prison for kidnapping

the grandson of a West German publisher in January. Thomas Haegin was found guilty of hostage-taking in the disappearance of Sven Axel Springer from an exclusive school in Zuoz, southeastem Switzerland, on Jan. 20. Sven Springer, grandson of Axel Springer, who publishes West Germany's biggest circulation newspaper, Das Bild, was released unharmed after three days and before his family had met a demand for a ransom of about \$5 million.

Mr. Haegin told the court he had become involved in the kidnapping out of a desire for adventure. Three other alleged kidnappers are due to stand trial Sept. 20 in Munich.

depot gates.

LOS ANGELES - The police arrested a couple and took their 23-month-old daughter into custody in connection with an attempt to rob a Brink's guard of \$8,000 at a restaurant in Los Angeles International Airport.
The restaurant cashier saw

the child take a money pouch from the guard's handcart as he was making a pickup of cash Tuesday, a police department spokesman said. The child brought the pouch to her father, who put it under his coat, the spokesman said.

The cashier alerted the guard. The baby's mother returned the pouch and apologized for her daughter. During a commotion that followed, the family slipped away, the police said. They were found later by two undercover officers in the international terminal.

The couple identified themselves as George Arias, 36, and Joanna Arias, 22, of Puerto Rico. They were held on suspicion of attempted robbery. The child was put in the custody of juvenile authorities.

Fear of Terrorists Grows Washington Part Service
WASHINGTON — The United missing following airplane acci-

A nuclear bomb was aboard a Navy A-4 fighter-bomber that rolled off a carrier deck into the Pacific Ocean in 1965. The plane and weapon sank at one of the deepest points of the Pacific, 500 miles (800 Kilometers) from land. They are presumably still there.

A bomb was jettisoned over
Wassaw Sound in Georgia in 1958

and sank, It was not armed with nuclear components, but it did have its detonator.

Visitors used to be allowed to walk through unclassified parts of the plant with only an escort. Now There have been 14 bombings of U.S. nuclear installations in the armed guards accompany the espast 10 years, and 300 threats. The bombings caused no senous dam-Mock terrorist attacks against

age or injury.
One of the most dramatic cases was in 1979. An employee of a General Electric plant in Burlington, North Carolina, that fabrinight attacks by members of the cates uranium fuel rods for civilian nuclear power plants stole two steel drums containing 145 pounds (65 kilograms) of pranium in powder form, enriched, but not to full bomb grade.

He demanded \$200,000 from GE. He threatened to disperse the uranium over two unidentified cities in the United States, but the FBI caught him before he could carry out his threats. He was sentenced to 15 years imprisonment.

"I don't want to be an alarmist," said William W. Hoover, assistant secretary for defense programs at the Department of Energy, "but someday somebody is going to try to steal something" more critical than powdered uranium. "We must be ready for that threat," said Mr. Hoover, a retired Air Force gener-

The Department of Energy has quadrupled its budget in the last five years to safeguard nuclear weapons and materials. It now spends \$700 million yearly.

The facilities include the Pantex plant in Amarillo, Texas, where nudear weapons are assembled; the Rocky Flats, Colorado, plant, where plutonium warheads are made: the Oak Ridge, Tennessee, plant, where uranium warheads are built; the Nevada Test Site, where atomic weapons are tested, and the Savannah River, South Carolina, and Hanford, Washington, plants, where plutonium is made.

"Anybody who thinks terrorists aren't cunning or ruthless enough to pull off a nuclear attack has forgotten the Munich Olympics, the showdown at Entebbe and the shooting of the pope," Representa-tive Richard A. Gephardt of Missouri told the Conference on International Terrorism sponsored last month by the Nuclear Control Institute. "And anybody who thinks an outlaw country won't help ter-rorists 'go miclear' hasn't been to Tehran or Tripoli," said Mr. Gep hardt, chairman of the Democratic

Guards at these Department of Energy installations have been increased by 500 men in the last 18 months.

Stronger fences have been built around the plants and more electronic sensors have been added to detect intruders.

A year ago, the Department of Energy established a training academy at Kirtland Air Force Base at Albuquerque, New Mexico, where 800 guards undergo Special Forces training every year.

When an atomic weapon travels by train in the United States, it moves in a metal car with a steel top locked in place by bolts. If the weapon is transported by road, it travels in a truck whose wheels can be locked and whose armor-plated sides can resist any weapon less

powerful than anti-tank shells. The Nuclear Regulatory Com mission does not allow multiple shipments of weapons-grade uranium or phitonium to be on the road simultaneously anywhere in the country if they add up to what the commission calls "trigger quanti-

Shuttle Launches 2 Satellites in a Day

CAPE CANAVERAL, Florida - Astronauts aboard the space shuttle Discovery deployed two satellites on the same day for the first time, then prepared their equipment Wednesday for a weekead space walk to repair a crippled

The Discovery was launched Tuesday, just before a storm hit the launch site, then it orbited the satellites the same day.

The first satellite, an Australian povernment communications unit. was sent into orbit in an emergency launch a day early because a shade protecting it from the sun had

The crew followed that with the launch late Tuesday of a radio-

relay station owned by the American Satellite Co.

On Wednesday, a crew member, William D. Fisher, told ground controllers that the electrical unit he is to use to bypass a defective timing device of the crippled satellite had passed an inspection. The \$85-million Syncom satellite was launched in April, but a timing mechanism apparently malfunctioned, preventing rocket firing that should have boosted the satellite to its operational orbit.

Engineers on the ground, meanwhile, scheduled training sessions Wednesday to study how the ship's robot arm will operate during the repair effort. The repair and space walk were planned for Saturday.

of its joints Tuesday and will not be able to move the 15,200-pound (6,900-kilogram) satellite as fast as originally planned.
Citizens in western Australia

turned on their lights Wednesday as the Discovery passed overhead, a salute for launching the Australian satellite.

The two satellite launches Tuesday set the stage for the space walk as early as Saturday. If the overhaul can be accomplished in one day, the shuttle probably will land Monday at Edwards Air Force Base, California.

Mr. Fisher and James D. van Hoften, a space walker who helped repair the Solar Max sun-watching satellite last year, plan to spend seven hours in Discovery's payload The flexible arm, which must bay rewiring the Syncom commuhold the satellite, lost power in one nications satellite.

3 Suspects Arrested by El Salvador In Café Killings; U.S. Aid Mentioned

By Marjorie Miller

Los Angeles Times Service SAN SALVADOR — President José Napoleón Duarte of El Salvador has announced the arrest of three guerrillas suspected of participating in the June 19 slaying of 13 persons, including four off-duty U.S. marines, at outdoor cafes here.

Accompanied by top military of-ficers at a press briefing Tuesday, Mr. Duarte read a letter to President Ronald Reagan in which he said that a U.S.-trained investigating commission aided in the inquiry that led to the arrests. The commission, which is under the Salvadoran attorney general's office, received FBI training in gathering evidence, in analysis and in

The three suspects were identified as members of Revolutionary Party of Central American Workers, a rebel faction that claimed responsibility for the killings.

One of those killed in the cafe attack turned out to be a guerrilla who died of bullet wounds at a hospital after the shooting. Seven other guerrillas are still at large, Mr. Duarte said.

Mr. Duarte declined to answer questions at the briefing, and few details of the capture of the rebels

were available, The suspects were identified as Juan Miguel Garcia Melendez, José Abraham Dimas Aguilar and Willian Celio Rivas Bolanos. All

are apparently Salvadorans. Colonel Aristides Montes, head of the National Guard, said that the three had been arrested six to 15 days earlier and that their cases have been presented to a military tribunal. He said human rights groups have been notified of their dinists. Misura officials said.

arrest, and they have been visited

by family members.

A U.S. Embassy spokesman. Donald Hamilton, said U.S. officials "cooperated with the Salvadorans on their investigation. We're confident they've got the right people and we are, of course,

GUINNESS IS GOD FOR EHOLDERS

"The events of the last few weeks have ended in the best possible way for Guinness shareholders, Bell's shareholders, and for Bell's itself.

For new shareholders, there's the opportunity to enjoy earnings per share growth and share price performance, from which our existing Guinness shareholders have benefited for the past four years.

For Guinness shareholders, the arrival of Bell's into the group is great news.

The union of Guinness and Bell's, two of the world's most famous brands, creates an International Beverage team of enormous strength. A team which I am confident will build on our joint success to date.

The Guinness group has been enjoying tremendous success over the last 4 years. From 1981 to 1985, our share price has consistently grown ahead of the average for the rest of the stock market.

What is more, Guinness earnings per share have grown by more than 122% over three years to 30th September 1984.

The achievement and the positive direction brought to Guinness by its new management team are a direct result of our successful twin growth strategies, encompassing profit growth for the present and the future.

PROFIT GROWTH FOR TODAY.

It is our aim to continuously improve our established businesses, International Beverages and Retailing.

In the U.S. alone, Guinness sales have risen by 81% in the three years to 31st March 1985 – outperforming all other import companies in this market sector.

I believe the acquisition of Bell's will further enhance our success in International Beverages.

We are also seeing tremendous growth in retailing. The acquisition of Lewis Meeson and RSMcColl convenience and retail chains adds to our list, making Guinness the largest operator in the convenience sector with 1100 stores.

PROFIT GROWTH FOR TOMORROW.

Our policy is always to expand into exciting new areas, as well as looking after our established business.

We have identified Healthcare and Publishing as areas of outstanding growth potential. Our Healthcare portfolio currently consists of Champneys Health Spas in Hertfordshire and Stobo Castle in Scotland as well as Nature's Best Health products.

Guinness Publishing is under new management, and now accounts for some fifty titles. Our twin growth strategies are obviously paying dividends because trading profits from retailing and other non-brewing activities continue to rise. In the half year to 31st March 1985, they were £6.7 million compared with £1.8 million in the half year to 31st March 1984.

TOWARDS AN EVEN BETTER FUTURE.

Sales of draught Guinness this calendar year are 8% ahead of last year, a result of the successful marketing and advertising skills brought to the company by the new management team. I believe that Bell's considerable potential can now also be realised.

With Guinness behind them, the Bell's brands can make real progress in the tough but tremendously valuable U.S. Scotch Whisky market.

I'd like to thank you all for your support during the last few weeks. Over the next few years, I am confident that you can look forward to continued growth and appreciation of your

According to his wife, Dorothy, mother of their four children, he had always wanted to be a clergyman, and delivered his first sermon at the age of 13. He was ordained at the age of 23 in the "colored" branch of the Dutch Reformed

Earlier this year South African security police Under South Africa's racial classification made available to newspapers tapes purporting laws, Mr. Boesak is a "colored," one of the 2.5 to prove that Mr. Boesak was involved in an illicit sexual relationship with Di Scott, 30, a He was born in a remote town in northwest- white woman working for the South African

Mr. Boesak acknowledged in February that he had maintained what he called "a relationship" with Miss Scott, but said: "No humanbeing should be forced to speak so publicly about his or her innermost feelings and I shall therefore not try in any way to explain the meaning of this relationship.

His local church suspended him but, after a divisive debate, reinstated him in March, saying a charge of adultery had been rejected. The episode tarnished Mr. Boesak's name among many whites, as the security police had apparently intended. But to many South Africans, the smear campaign reinforced his anti-apartheid

Mr. Boesak's wife said Tuesday that his stay in the Netherlands had shown him "what the world should be, how it could be."
"He will not be frightened," she said.

U.S. Is Ready to Talk With Soviet **About Resuming Direct Air Travel**

By Bernard Gwertzman New York Times Service

WASHINGTON — The United States has told the Soviet Union that it is ready to open talks next month for resuming direct air travel between the two countries, Reagan administration officials said.

Soviet landing rights in the United States were canceled after Poland imposed martial law, backed by the Soviet Union, in 1981.

Tuesday that a new civil aviation pact could be ready for the meeting between President Ronald Reagan and Mikhail S. Gorbachev, the Soviet leader, in Geneva on Nov. 19

They said there was little likelihood of progress in arms control or on regional issues. But they said that substantive accords on civil aviation, on cultural, scientific, technical exchanges, and on con-sular affairs could help put relations on a sounder basis.

The decision to go ahead with the aviation talks was part of a policy advocated by Secretary of State George P. Shultz, who wants ments, and we don't dismiss their the summit meeting to be more value," Mr. McFarlane said. "The than a get-acquainted session. He Soviet leadership should know that

"We seek incremental improve-

small steps forward and that we will respond in proportion to what we see from them. We should recognize that those who seek only small improvements often end up

An executive of Pan American World Airways, which would be the U.S. carrier under a new air pact, said, "We are interested in resuming service."

He said that talks had already

been held between Pan Am and Aeroflot, the Soviet airline, and that Pan Am was also interested in flying through the Soviet Union between Western Europe and India. He said Pan Am was considering the possibility of resuming service to Moscow in the summer of 1986 if an accord was reached.

The Soviet Union has been pressing for the renewal of landing rights in New York and Washington. State Department officials said. In fact, the Russians have been holding up agreement on cul-tural and scientific exchanges and on new consulates in Kiev and New York until a civil aviation accord

was signed, they said. Until recently, the United States refused to consider a new aviation pact until new safety rules had been agreed to in the air lanes of the North Pacific to reduce chances of another incident such as the shooting down by Soviet planes of a South Korean airliner in 1983 that resulted in 269 deaths.

On July 30, a preliminary accord on North Pacific air safety was announced by the United States, the Soviet Union and Japan, and shortly thereafter, the State Department proposed that talks with the Soviet Union on direct air service be held in Washington on Sept. 16, officials

In an unpublicized meeting two weeks ago at the Department of Transportation, government officials and industry executives discussed what should be included in a new aviation accord, participants

U.K. Urgently Checking Jet Engines Similar to Type in Manchester Fire

LONDON - Airlines in Britain carried out urgent checks on Pratt & Whitney jet engines Wednesday after authorities discovered cracks in some versions. The discovery occurred after the explosion of an engine caused a fatal fire last

Thursday at Manchester Airport. The checks, ordered by Britain's Civil Aviation Authority, caused cancellation of two British Airways flights from Gatwick Airport and delays to 14 other flights at airports around the country.

The checks involved the U.S. manufacturer's JT8D-15 engine, the same type of engine fitted to the British Airtours Boeing 737 that caught fire at Manchester in northern England.

One of the plane's two engines exploded during takeoff, rupturing

Since the use of the sensor was disclosed in June, lawyers have said it could violate the "curphable cause" disclosed in June, lawyers have said it could violate the "probable cause" standard for giving breath tests.

Lifetime Oral Cholera Vaccine Tested

ADELAIDE, Australia (Reuters) — Researchers at Adelaide University say they have developed an oral vaccine that could help eliminate cholera as a major killer in Third World countries. The single-dose vaccine is expected to last a lifetime, while the present intravenous vaccine lasts only about six months.

The oral vaccine has been tested on animals, a spokesman for the team said. The scientists, led by Professor Derrick Rowley, will begin tests on humans in the United States early next year, and the World Health Organization will carry out field trials in India or Bangladesh in 1987. The spokesman said it was hoped that the vaccine could be on the world market by 1988. It would only cost a few dollars per dose, he said.

Psychic Research Lab's Funds Halted

New Synthetic Anti-Dwarfism Drug

COPENHAGEN (AP) - Nordisk Gentofte AS, a major producer of insulin, growth hormones and blood plasm, says it has produced a brilliant lights shining from the genetically engineered growth hormone identical with the human horsubmarine. Such fish normally see mone and expects to market an anti-dwarfism drug next year.

A spokesman said genetically engineered growth hormones developed in the United States and Sweden had side-effects, including a reaction against antibodies, while Nordisk Gentôfte's synthetic hormone acts

exactly like the human hormone, with no side-effects.

The company said it was making clinical tests in several countries and deposits of molten rock crupt from seeking official approval of production and waste-handling methods.

Antibody Test for Risk of Diabetes

BOSTON (AP) - Screening tests for antibodies could help identify young people who risk getting juvenile diabetes, perhaps in time to prevent the disease, researchers at the Joslin Diabetes Center in Boston

prevent the disease, researchers at the Josin Diabetes Center in Boston report in the New England Journal of Medicine.

Dr. George S. Eisenbarth and his colleagues said one new test reveals antibodies that attack specialized pancreatic cells that produce insulin. When these islet cells are destroyed, the result is juvenile diabetes, whose many side effects include blindness and kidney failure.

The report said that the test was still too cumbersome to check everyone's susceptibility, but that simpler versions should be possible. It would then be "immerative to screen the whole population" if current

would then be "imperative to screen the whole population" if current research for a drug to prevent juvenile diabetes proves successful.

Zoos to Send Rare Deer Back to China

LONDON (AP) — Three English zoos plan to help reintroduce the Père David's Deer into its native habitat in China, where the animal has been extinct for 46 years. The London Zoo says it and the Chester and Marwell zoos will send 30 deer next year to a preserve near the Yellow Sea, 150 miles (240 kilometers) northeast of Shanghai.

The deer is named after a French naturalist who bought a number of them in 1865. The 16 that survived the trip to the West formed the core of the world's current population of 1,500.

Deep Dives Show Wide Range of Exotic Sea-Floor Creatures

By Walter Sullivan

Fish and sea and retrieved with an A-frame nary. A 40-square-inch section of be used even in fairly rough seas.

A number of new animal species were collected by the Alvin's crew last month in a series of dives into the Sea of Cortez, or Gulf of California. The specimens, now under analysis at Woods Hole, are expected to reveal many previously un-known bottom dwellers, since the environment in the Sea of Cortez differs from that of previously explored hot-spring areas along the East Pacific Rise and the nearby Galapagos Rift.

According to a report in the journal Science by Dr. Holger W. Jannasch and Dr. Michael J. Mottl of Woods Hole, such communities suggest the "possible occurrence of similar life forms in other planetary settings" where water but not light is present

It also proposes that in case of a "catastrophic darkening" of Earth, such as might follow nuclear war, "the chance of survival of such ecomunity" on Earth.

Another Woods Hole scientist, Dr. J. Frederick Grassle, reported in the same issue of Science that the evolution of tube worms, giant clams and mussels at widely separated sites on both sides of the North American continent "represents either an unusual distribution from a single lineage, or, even more remarkable, cases of parallel evolu-

In a series of dives off the coast of Japan. French and Japanese submarines have found colonies of giant clams in at least three sites. The first was discovered at a depth The Alvin belongs to the U.S. of 12,566 feet by the French deepyou empties into the trench formed where the floor of the Philippine

putrid smell, but there was no evi-dence of abundant hydrogen sul-it is suspected that their energy

This suggested, as deduced from a similar haul off Oregon, that such communities use some other chemistry, such as oxidation of methane or ammonia, as their energy source. Whether those substances are of ganic matter deposited in the sediment long ago is uncertain.

As reported in the journal Nature, at least two more such colonies have been found, and recorded images appear to show tube worms. One dive was by the Japanese craft Shinkai in 4,300 feet of water near the Izu Peninsula. The other was by the Nantile at a record depth of 18,504 feet on the steep inner wall of the Japan Trench. Both were in water only slightly warmer than the from the mother ship. frigid temperature characteristic of the sea floor.

The dives off Japan also identified two submarine volcanoes riding the sea floor toward annihilation in the trenches. One, the Dai-ichi Seamount at the south end of the Japan Trench, is comparable in size to Mount Fuji.

Colonies of exotic life have been found in two other areas. One was discovered on an Alvin dive last Pacific floor is descending under Washington and Oregon — the process believed responsible for volcanic activity such as that of Mount St. Helens. No trench is visible there because it is filled by sediment from the Columbia River.

Live giant clams have also been dredged from the deep trench off Peru. The trenches, worldwide, appear to harbor such exotic species which, in the view of Dr. Edwin Suess of Oregon State University, triples the extent of their known

Similar communities have been discovered in substantially different environments under the Gulf of Mexico. A fissure jammed with tube worms was found by the Alvin where, at a depth of 12.664 feet, the limestone formation on which systems is the highest of any com- Florida rests emerges as a great escarpment from the deep-lying Gulf sediments.

Giant mussels collected there are being studied by Dr. Ruth Turner

The sample reportedly emitted a of Harvard University, who said source is hydrogen sulfide or ammonia from the sediments rich in oil synthesized with the aid of sun-

Oceanographers from Texas A&M University have hauled up more than 1,700 pounds of such volcanic origin or derived from ornear the outer edge of the continen-tal shelf 150 miles off the Louisiana coast. Giant clams have also been reported in metal-rich hot springs

along the Mid-Atlantic Ridge. The Alvin, which was built in the 1960s, once swamped and sank on an early dive, with no one aboard. On a later dive it became trapped among rocks several thousand feet down on the mid-Atlantic rift and escaped only after careful coaching

On this descent - its 1,595th there were no mishaps. The final rapture, on ascending after many hours in the black depths, is seeing the returning light of the sun, upon which all life depends, except in communities like those below.

The Dust Isn't American

It is as though the Reagan administration had been sprinkled with a chemical that al-lowed it to be tracked across the roughest and remotest diplomatic terrain: sprinkled with something akin to the "spy dust" that the administration now reports that the Russians sprinkled on and about Americans living in Moscow, the better to spy on them. You can tell it is the Reagan administration by the prickly quality of its exchanges with the Soviet Union and, perhaps even more, by the anxious, tiresome quality of much American criticism of administration policy.

It should surprise no one that the Soviet police may have used a chemical powder to track Americans in Moscow; other intelligence agencies may do something similar. Further-more, it is in character — and here is the alarming part — for the KGB to have used a chemical either knowing or not knowing and not caring that it might harm those who were dusted with it. The State Department, having found through new tests and measurements that the dosages were increasing, surely was right to sound an alert. The department recalls, as it should the resentment stirred among American diplomats by the official failure to tell them of the possible risks of an earlier Soviet counterintelligence operation involv-

ing microwave bombardment of the embassy. In the current instance, the warning to Americans and the protest to the Kremlin were bound to come off as something other than strictly humanitarian in origin. The United States does not enjoy a relationship with the Soviet Union that allows for the early and discuss the technique of such meetings. discreet treatment of such questions.

The Soviet government is counterattacking with a familiar combination of asserted innoceace and polemical overkill. Domestic criticism of the administration's approach is another matter. Again, the onus is being put not so much on the suspected Soviet act as on the American response to it. Thus does a police operation mounted by the Soviets become a "controversy" in which the American side is the principal one held to account. To the president - in order to indict him for somehow jeopardizing the forthcoming Reagan-Gorbachev summit - is being attributed precisely the capacity for planning events that he is otherwise faulted for lacking.

We do not think that the prospects of the summit have been altered in the slightest. We think that the Soviets should stop the dusting at least until a fair determination is made of what its dangers may be.

- THE WASHINGTON POST.

No Winking at Apartheid

President Reagan thinks that apartheid is repugnant, in which belief he is joined by most civilized people. He also thinks that apartheid is disappearing, that segregation has ended in South Africa under a "reformist" regime reacting to a civil rights movement resembling that of the American '60s. In this belief he is joined by no one who cares about life and liberty and the South African abyss.

If Mr. Reagan believes what he says, he has not yet grasped the essence of apartheid. If he does not believe what he says, the explanation is more troubling: that he assumes that Americans do not care if their president misrepresents as "substantial changes" a recent chain of negative events in South Africa. The issue is not how America can best use its limited influence with the whites who subjugate a huge black majority. The issue at the moment is simpler: Why does Mr. Reagan volunteer such a richly cosmetic portrait of racism, when the act of doing so aligns him with the oppressors?

The president's aides have lamely corrected the most obvious misstatement, made in a radio interview. It is not true that, as he said, segregation in hotels and restaurants has "all been eliminated." The White House says he meant "not totally." Even that is an overstatement; perhaps a few dozen hotels and restau-

rants in large cities have been desegregated. Mr. Reagan claims that blacks "can buy property in hitherto white areas." Some blacks can buy leasehold rights for land in black townships, but only in Soweto has this policy

taken effect; and nonwhites may not buy or rent property outside their designated "group areas." Blacks can indeed join trade unions, as Mr. Reagan said, but their right to strike and bargain collectively is restricted. It is true that the Pretoria regime has ended its ban on racially mixed marriages; but nonwhite spouses cannot live in areas designated as white, or send their children to white schools.

And how meager is even this list. Look at what is missing. Voting rights are denied to blacks. The school system remains grotesquely unequal. Nonwhite dissent is systematically suppressed; for weeks now the government has used emergency powers to rout demonstrators and detain their leaders.

Neither did Mr. Reagan make any reference to President P.W. Botha's failure to deliver the reforms that Washington believed he would announce two weeks ago. This silence contrasts with the views of the national security adviser, Robert McFarlane, who says that the failure to pursue reform is bringing South Africa to the abyss of massive violence.

Even presidents can be glib, roseate or mistaken - but rarely without effect. What hurts most about Mr. Reagan's ramble is that it will be taken seriously by South Africans of all races as they try to fathom where America stands. Mr. Botha and apartheid's victims may both read his woolly words to mean, wrongly, that most Americans are willing to speak pi-ously but wink at monumental racial injustice. - THE NEW YORK TIMES.

Competition Via Satellite

few private companies launch their own international communications satellites. Until now that was permitted only to Intelsat, the 109country consortium that controls the business, so the decision is good news. Competition could bring more efficient use of this dazzling technology. But the U.S. Federal Communications Commission's action is only a small first step. If most consumers are to reap the benefits. Washington will have to convince regulators in other countries to let competition work.

Intelsat, organized under U.S. leadership in 1964, runs a fine communications network. Its 16 satellites, parked over the Atlantic, Pacific and Indian oceans, have cut costs of international telephone calls. That being the case, why the drive in Washington to allow private competitors? Because Intelsat subsidizes lowvolume users at the expense of heavy users. The pricing system pleases the politically sensitive managers of telephone systems in dozens of smaller countries; it keeps their costs down. But their gain is at the expense of businesses like banks that need to move very large amounts of data between offices. The present approach has thus created an enormous profit potential for satellites dedicated to high-volume use — and pressure to permit them.

Last November, feeling the pressure, the Reagan administration chose the blandest compromise it could find. It blessed satellite competition in principle but recommended it only if new entrants were barred from sending messages through local telephone systems. That restriction presumably would let satellite

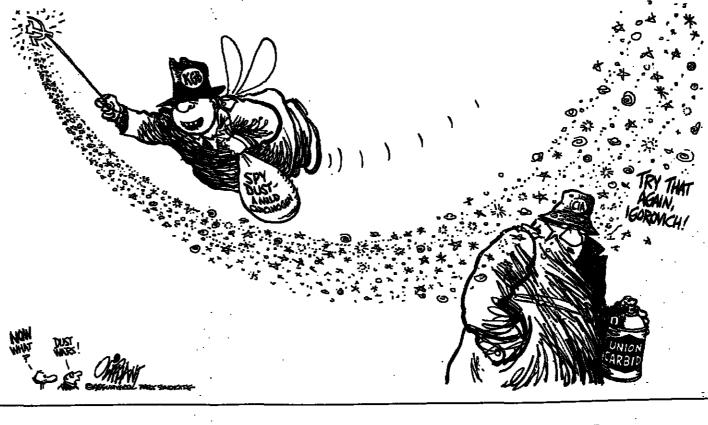

American regulators have decided to let a operators satisfy specialized communications needs without cutting deeply into Intelsat revenues. The FCC has since followed the administration's lead, licensing only satellites that serve offices within the same company.

That is not the end of the story. Intelsat claims to serve poor people by holding down costs of satellite links to poor countries. In fact, most users there are international companies that can afford to pay. In any case, charges for the satellite link are typically only about 10 percent of the cost of an international call. The rest is paid to local phone companies that often overcharge international customers.

Reagan administration deregulators hope that the limited experiment with competition for business users will lead other consumers to demand equal treatment. But there is no need to wait passively for other governments to get the message. U.S. telephone regulators would be wiser to imitate airline deregulators, negotiating open competition with a few sympathetic countries. Once cheap telephone service was in place to, say, the Netherlands, West Germany would have a tough time resisting the example.

International communications competition might stimulate the development of new technology and new services. At the very least it would make better use of existing satellite capacity by linking prices to costs. But competition will not come quickly - and maybe not at all — without more help from its friends. The FCC's modest experiment is fine. A broad deregulation strategy, one formulated by the administration, would be a lot better.

- THE NEW YORK TIMES.

Pro: America Is Entitled to Bar Excessive Imports

By Lloyd Bentsen The writer, a Democrat, is a U.S. Senator from Texas and co-sponsor of a bill to impose a 25-percent surcharge on imports from several countries.

WASHINGTON —I have been a free-trader all my life, but it is time to reassess this basic belief. Free trade assumes some reasonable balance among nations, but that is no longer true in today's world of government-directed trade. A heavy imbalance in trade is causing a substantial transfer of wealth, impoverishing some nations while enriching others. The United States has had a trade

deficit in all but two of the last 15 years. Our manufacturing base is eroding daily. Managers of American companies, determined to keep their world market share, are moving facilities overseas, leaving unemployed workers at home. Since 1979 we have lost 1.7 million manufacturing jobs. We are building plants abroad, sendng away jobs that in all likelihood will never return. This year the United States became a debtor nation for the first time since 1914. If current trends continue we will owe other countries over \$1 trillion by 1990.

Critics of legislative intervention to ease this terrible imbalance say that it

is really America's fault, the result of extraordinary step of setting a fixed self-inflicted wounds. They cate the bloated dollar. They point to management failures, shoddy workman-ship, the propensity of American consumers to spend instead of save, a

iax educational system. There is some justification for these assertions, particularly about the dollar rate, which is caused partly by huge budget deficits and the con-sequent high interest rates, which at-tract competition for dollar investments. We have taken a modest first crack at reducing the deficit. But it is going to take time to make long-term corrections, and what we must do now is buy that time.

The first priority is to establish a coherent trade policy. Second, we must establish an aggressive trade policy that insists on more balance in

ratio between exports and imports.
Who is in charge of trade in Washington? Nobody and everybody. One day it is the Defense Department, which does not want to upset the European Community over agricultural subsidies because we are trying to persuade our partners in NATO to accept cruise missiles. The next day it is the State Department, which vetoes

an attempt by our trade representa-

United Nations and is one of our most important allies. So it goes. When the United States

voluntarily agreed to end import quo-tas on cars from Japan earlier this year - without seeking anything in return - a State Department official was quoted as saying he was pleased

Anti: Import Tariffs Are a Cover-Up

WASHINGTON — Trade legis-lation will be the big story after Labor Day next Monday. An angry U.S. Congress, convinced that Japan has contrived to run an "unfair" trade surplus with the United States, will try to pass retaliatory measures.

A Democratic proposal to slap a 25-percent extra duty on imports from Japan (with Taiwan, South Korea and Brazil thrown in for good measure) will get a big push in the House. Republican-sponsored bills take a different approach, but all are directed to the same end. With worsening monthly trade statistics predictable this fall, the result will be scare headlines and the-sky-is-falling bulletins on the evening news.

not to yield to pressure for stiffer quotas on shoe imports may merely what the protectionist appetite on Capitol Hill, adding to the charge that the administration has "no policy" on trade. Senate Majority Leader Bob Dole, it should be noted, predicted while junketing in Asia that Congress is "going to take back" trade policy from the White House.

The backdrop for the big protectionist drive is an economy much weaker than the administration and many private forecasters had expected, with no real signs of a predicted resurgence. A certain unease about the direction of the Reagan administration in its second term, and about the health of the president, may be contributing to the concern.

But the major problem clearly is the strong competition from imported goods. This is adversely affecting

By Hobart Rowen

manufacturing businesses in America and will continue to do so for as long. as the dollar remains overvalued. If Congress goes protectionist, the

result will make only a small dent in a global U.S. trade deficit running at around \$150 billion a year - and at the expense of touching off a trade war and inflation in consumer prices. Quotas and import surcharges are a cover-up for industrial weakness, not a solution of the basic problem. "The Competition: Dealing

With Japan," published by the Hud-son Institute, Thomas Pepper, Merit E. Janow and Jimmy W. Wheeler make a key point: "The Japanese are not responsible ... for the revital-ization of the U.S. economy. That depends on the attitudes and actions of Americans themselves."

American businessmen for too many years have taken it for granted that their products are the best. But customers around the world have another view. From videotape recorders to microwave ovens to telephone-answering machines, the Japanese have taken ideas or inventions created by others and successfully applied modern methods to marketing and merchandising. What has happened to the old Yankee trader spirit?

Beyond the obvious need for American managers and workers to rededicate their skills to marketing and to product quality, the Japanese and American governments must take some sensible policy actions. Having profited in a spectacular

way from global trade expansion, Japan has a clear obligation to do what is necessary to keep the global economy functioning smoothly: There can no longer be a single-minded Japanese dedication to export-led growth.

The Liberal Democratic Party leader. Kiichi Miyazawa, made the point on a recent visit that Japan must now emphasize housing and other goals that will enhance the Japanese quality of life, and must expand its real

capacity to import foreign goods.

On the American side, the first priority should be to deal with the overvalued dollar by taking serious measures to reduce the federal budset deficit. Economist C. Fred Bergsten's rule of thumb is that each oneworth about \$3 billion in the trade deficit: Over the long run, a 20-percent fall in the dollar would cut the trade deficit by about \$60 billion.

Expansion of the economies in Western Europe, coincident with similar steps in Japan, would work to achieve a better trade balance and more sensible currency relationships. If America is to be serious about meeting the competitive challenges

from Japan, there should be a new American commitment to education, especially in math and the sciences. Mr. Reagan should be applauded for his stand on shoe imports and for his general resistance to the protectionist urges of Senate Republicans. But he must supplement his "free trade" posture with a realistic pro-

gram to ease the impact of import competition on employers and jobs. The Washington Post.

quota restriction." Those of us who coordinated and government-directed trade policies aggravate the problem are accused of "Japan-bashing."

There was a time when the United

States was so dominant in world trade that we could afford to be polite and self-effacing. No longer.

The Japanese have been remarkably successful in developing vested rests in America. Most of the major lobbyists in Washington have at least one Japanese client. Former trade officials are quickly retained by Japanese companies. American jour-nalists are assiduously courted, both here and on trips to Japan. The Japanese buy as much as 50 pages at a time in special advertising sections of tive to open up Japanese markets because Japan votes with us in the our better business magazines, and massage with vigor some of our more influential shapers of opinion.

This is good business for them and should come as no surprise. The Japanese are the most persuasive, pa-tient and successful of all our competitors. There have been six major efforts to open the Japanese market to our exports since 1982. But in that period the trade deficit has doubled.

Here is an example of what happens. The Japanese announced on June 1 that they were climinating a ban on U.S.-made shipping containers. At the same time, they imposed "safety regulations" for transporting containers from ships to factories: no travel on freeways, no right turns, no travel at night, etc. It makes one think twice about exporting containers.

Someone is always around to raise the specter of the disastrous Smoot-Hawley tariff whenever there is "tough talk" about trade. Nobody wants to return to those days of open trade warfare. But the Reagan administration, while it talks free trade and refuses even to consider an ag... Nothing read in a book can pregressive trade strategy, has taken a pare a Westerner for the mass of whole series of ad hoc protectionist actions that could easily land us in an accidental trade war.

Responding willy-re political pressure, the administration make you feel claustrophobic. has adopted protective measures for products ranging from heavy motorcycles to autos, steel or pasta. A tough, comprehensive trade policy would make much more sense than this pyramiding quota binge.

We must accept our trading partners for what they are. We have tried to ferret out their ever shifting, nontariff barriers. We have encouraged them to increase consumption and reduce savings. We have even suggested to the Japanese that they change their culture.

All this is arrogant, naive nonsense. What we must do is put countries like Japan, and others who would emulate these nations, on notice that America will no longer accept enormous trade deficits.

our products and excessive trade surpluses. Specifically, I suggest legisla-tion specifying that these nations' sales to us should not exceed what Japan --- or any other trading partner - must gradually reduce these surpluses or face a mandatory and immediate 25-percent surcharge on imports to the United States.

Strong medicine? Sure, but it is sults. It should be a policy that is easily understood, a threat to no one, but pragmatic, with no apologies for self-interest. The Japanese understand sound business practices and we are their largest customer. The leverage is ours.

HENGDU, China — Harvest has started in Sichuan province in southwestern China, and the scene is classic. The visitor's eye sweeps across a checkerboard of ripening rice, climbing beans, squash, toms-toes, sweet potatoes, egoplant, sugarcane. The hot red peppers that space Sichuan food are drying on straw mats at the edge of the road.

The Chengdu plain, watered by a 2,000-year-old irrigation system, is probably China's richest land. An American seeing its extraordinary beauty and fertility thinks inevitably of his own country's great farmland But there is one overwhelming difference: population. When the traveling foreigner stops for a moment to look or take a photograph, what seemed to be lonely fields turn out to be something else. Within minutes a crowd of peasants materializes from those fields to look at the stranger.

10, 20, 50, they crowd around.
One of them is a woman carrying a basket that she has filled with greens. Her name is Xugui Fang, she says—33 years old, with a 6-year-old daughter. Her husband was a soldier in the People's Liberation Army, but now he is back home farming with her. What did they grow? I asked. Rice

and sweet potatoes at this season, she said; later, wheat and vegetables. It sounded like a fair way to make a living as farmers. Then I thought to ask how much land they worked.

The answer was that peasants here are alloted one-seventh of an acre (580 square meters) per person in the household. Counting wife, husband and-child, that meant her family farmed less than half an acre. Similarly, a few miles down the road I talked with a group of peasants and discovered that they had a third of an acre each to farm.

In my ignorance I had assumed that the beautiful vistas of the Chengdu plain were divided into tracts large enough so that a hardworking family could make substan-tial income under Deng Xiaoping's "responsibility system" allowing peasants to plant what they wish and market their crops on their own afterselling a basic amount to the state.

But I had reckoned without the fundamental fact of Chinese society: the numbers of people who have to share what resources there are, including land. The amount of land available to a peasant family in any area is a question of dividing the tillable acreage by the numbers.

Sichuan is a huge province, the size of France, but its population is over 100 million now. And the larger part of its land area is useless for agriculture — the beautiful mountains running up to Tibet, for example, where the last wild giant pandas live.

The figures explain why the scene as one drives through is so incredibly tidy. There is hardly a weed in sight, hardly a strip of wasteland. Every inch is planted. It has to be.

population in China. In a booming town like Chengdu it is hard to keep alloat in the sea of bicycles and carts and beoble. Even country villa

Experiencing that overwhelming reality gives one a different view of the issue that has caused such friction recently between the United States and the People's Republic: population control. China expressed outrage when the U.S. House of Representatives last month approved an amendment denying population assistance funds to China because, it found, China coerced abortion and steribization. The amendment said that infanticide also occurred and called the practices "crimes against humanity

It is a fact that coercion is used to enforce China's policy of "one cou-ple, one child." Couples who have a second pregnancy may face severe social pressure and job problems. The farmers I met on the road in How? By setting a trade ceiling on nations with a history of barriers to equivalent of \$350 if they had a second child and \$1,100 for a third.

The propriety of the methods used to discourage childbearing is a fair question. But outsiders should not they buy from us by more than 165 make ringing statements about it percent. When this ratio is exceeded, without understanding the problem.

There are well over a billion Chinese now, 22 percent of the human race living on 7 percent of the world's arable land. The official aim since 1979 has been to slow the increase so that the population reaches 1.2 biltime to cut through the rhetoric and establish a trade policy built on remove. The policy may well fall short, not because of outside pressure but because it conflicts with human instincts. And what then? It is hard toforesee anything but a Malthusian struggle in the most literal sense: a struggle to divide exhausted resources, a struggle for life.

It Was an Adult's Job That a Girl Did anymore. Adults must talk about By Ellen Goodman

FROM OUR AUG. 29 PAGES, 75 AND 50 YEARS AGO 1910: U.S. Race Relations Improve

LONDON — Discussing the general condition of the negro race in America, Mr. Booker T. Washington said: "There is progress, both moral and material, to report in the condition of the negro, and there is also an improvement in the relations between the two races. In Europe you always hear the worst. You do not hear of progress as quickly as you do of lynch-ings. If the colored people build a college or found a bank, it is not noticed. But solid proof of the advance of the negro is the fact that 45 years ago only two percent of the colored population could read or write, whereas now the percentage is 57. In the South, negro banks and factories are patronized by both races. There is practically no social mingling of the two races, but the laws regarding the segregation of the negro on the railways, for instance,

Zionist congress here [on Aug. 27]. "This world Jewish tribunal must in honor and truth concern itself with the German-Jewish problem. If this congress were to be silent it might well be thought by the world that the situation Reich's warfare on civilization." Rabbi Samutals, and that these embassies should be head-

BOSTON — On Sunday night, Jane Smith left the airport where she was waiting for her hus-band Arthur and her daughter Samantha, and she rode instead to the crash site. The plane, her husband's plane, her daughter's plane, "it was just a pile of ashes." They were simply, suddenly gone. Later on someone would find one

thing unscathed on that charred piece of Maine earth: the script of a television show that Samantha was going to star in. The script became the postscript to a life ended at 13. In the hours after her death, public figures and private friends said that Samantha Smith had "captured our imagination" or our "hearts," or at least our attention. She did not do it by winning any gold medals. She was not preco-

cious, not a child prodigy.

She was just a kid who thought like a kid. She woke up one morning in Maine when she was 10 and "wondered if this was going to be the last day of the Earth." She read about the arms race and thought,
"It all seemed so dumb to me."

And then she did something that only an unsophisticated kid might do, in the years before diplomacy breeds directness out of them, be-fore cynicism and a sense of poweressness sets in. She wrote a letter to the Soviet leader. "I have been wor-rying about Russia and the United States getting into a nuclear war," she told Yuri Andropov. "Are you going to vote to have a war or not?
If you aren't please tell me how you are going to help to not have a war."
Mr. Andropov wrote back with
an invitation. Come, he said, "see

In 1983, Samantha Smith went to

for yourself." So she did.

the Soviet Union, accompanied by parents and photographers, tracked by commentators and columnists. Some complained that she was a "tool" of Soviet propaganda, a "dupe" of the Soviets. Others wondered if we were making too much of a fuss about her. I was amused at the adults who worried about this adventure. I could not imagine what we had to

I feel really weird being asked about peace all the time.'

fear from a goodwill trip, from one 11-year-old American learning and saying good things about 11-year-old Soviets. There is little to fear from the Red carpet treatment.
As for the fuss over Samantha, I thought then and now that we often let children like her voice our pleas for peace. We push the young forward, we hand them the pens or the microphones, we encourage them to say the things that adults edit out of their language because of their fear of sounding naive. Children often do not worry about sounding "childish." When Samantha came home, she

wrote about her experience: "I mean, if we could be friends by just getting to know each other better, then what are our countries really arguing about? Nothing could be more important than not having a war if a war would kill everything." Adults cannot say such things

SALT and START treaties, about star wars" this and MX that, about parity and verification. Adults must be suspicious, cantious. At the Boston Roundtable

discussions on peace policy last week, Marcus Raskin of the Institute for Policy Studies put his finger on it. "At the present, " he said ruefully, "people are very commit-ted to being non-utopian. They don't want to look like fools." So we ask children to express the fears that we share and the idealism

that is, finally, our hope.

There is something sad about the search for a child to lead us. It is a kind of abdication of power. Two years after her trip to the Soviet Union, Samantha Smith said, "I feel really weird being asked about peace all the time." Adults, after all, are supposed to figure it out.
It is lousy to write an obitnary for

a 13-year-old. I cannot imagine a pain greater than that of losing a child unless it is also losing the husband who could share that pain. The brief years of Samantha Smith's celebrity were full of highs: talk shows, a book, a part in a television serial, carrying a script from London back to Maine on a

foggy, rainy Sunday night.

But she told a reporter in May:

"When I am 16 I want to get my
driver's license. After that, who knows?" Like countless other kids who lie in bed sometimes and think about bombs, Samantha Smith just wanted to grow up.

Here comes something naive, idealistic and utopian from a certifiable adult: Kids are like that on both sides of the Iron Curtain. Washington Post Writers Group.

LETTERS TO THE EDITOR

No Parallel With Israel Regarding "Israel Should Clean Up its Own Act" (Aug. 22):

For a former associate of the World Jewish Congress, Mark A. Brizonsky displays a remarkable lack of knowledge of recent Israeli history. In writing that the behavior of Israel in respect of the Palestinians of the West Bank is not different from that of the South African government toward the black arrival. erament toward the black majority, he overlooks some important points. Never since the whites invaded the

southern part of Africa has the black population declared a war against its oppressors; without any form of terrorism, the blacks endured humilia-tion by the white minority for centurity ries. The Palestinians on the West Bank, helped by Arab states, invaded Israel three times. The West Bank was Arab before Israel occupied it in a defensive move. No military occu-pation may last forever, but the Palestinians asked for it, obsessed with

the idea of driving Israel into the sea.

Another significant difference between the situation of the Palestinans and that of black South Africans is their present economic status. Scarcely anywhere in the Arab world does a population have such a high standard of living as do the Palestinians on the West Bank.

Haastrecht, Netherlands.

You have run an article by Mark-Bruzonsky, the substance of which only Mr. Bruzonsky is responsible for. His reference to his terminated employment at the World-Jewish Congress indicates that his views are totally alien to ours and represents a feeble attempt on his part to seek to give these views credence by attemptng to make a misicading association with the World Jewish Congress.

FRIEDA S. LEWIS, Chairman World Jewish Congress (United States), New York.

Contending Market Views Keep Stocks on the Ropes

By EDWARD ROHRBACH

WALL STREET WATCH

International Herald Tribun ARIS - Stocks, staggered by the series of below-the-belt news reports about the U.S. economy, have been taking a standing eight count since early August. And as investors themselves bob and weave, the decision is split whether wall Street, a notorious bleeder, will get tanked — or come out

smoking.

In the latter corner is Bear Steams, whose Peter J. Cando thinks stocks are back now in better fighting trim than they were in 1982, before the bull market started.

"Real interest rates by any measure, have come down as much "Real interest rates, by any measure, have come down as much as they did then and the rate

of monetary growth is even stronger than it was in 1982," he said. "So we believe the Buy the highest beta stock

timing is very close." What's been holding Wall Street back, he said, has been the strong dollar parrying the impact of the Federal Reserve's stimulus on the econo-

my. He added that normally under these conditions the time lag is nine months, which, since the Fed began pumping last October, works out to about now.

you can get

– and pray.²

Signs he is looking for to signal the economy's second wind are stabilization of spot commodity prices, notably copper and lumber, and "production numbers perking up some more."

Mr. Canelo warns, however, that on the technical side of the market, stocks must stay ranked above their long-term trend line. He noted that chartists figure this at 1,270 to 1,295 on the Dow. "It would be just like the stock market to react to some good economic news on the economy by advancing to new highs, then

economic news on the economy by advancing to new highs, then retreating to test that trend line," he said.

At the top of his buy list he put "building-related and durables," citing forest-product stocks and such products as cars and

N THE other hand, he believes that consumer growth stocks are "expensive" and Wall Street could "turn brutal" against them. Here he placed broadcasting, beverages,

entertainment, hospital supply, restaurants and toys.

He also thinks the technology sector will show a lot of punch in a rising economy. But rather than semiconductors, for example, he said instrumentation stocks such as Hewlett-Packard are "safer." Another favorite group is chemicals, along with machine tools, fertilizers and aluminums.

tools, fertilizers and aluminums.

For investors who are hungry enough to take a shot at the title, he confided: "Buy the highest beta [volatility] stock you can get—one that's come a long way off its July high—and pray."

Yet, as Marshall Acuff Jr., portfolio strategist at Smith Barney, noted, "The burden of proof rests on the shoulders of those looking for a sharp pickup in the economy." But so far, with "most indicators suggesting little improvement," he sees a "stockmarket setting conducive to declining expectations."

Charles Maxwell of Cyrus J. Lawrence sizes up the big match this way: "One of the liveliest conflicts today is between supporters of the concept that there will be a solid U.S. recovery in late ers of the concept that there will be a solid U.S. recovery in late

1985 and 1986, with accompanying surge of profits from manufacturing and high-tech industries, and those observers who expect a recession shortly, or at least foresee relatively low levels of GNP growth with flat to lower corporate profits except in a few special areas."

And to Greg A. Smith, research director at Prudential-Bache, "The pattern is becoming quite clear." His commentary: "We have periods when investors believe a sharp improvement is (Continued on Page 13, Col. 4)

China Has

Big Deficit

Compiled by Our Staff From Dispatches
BELJING — China registered a
merchandise-trade deficit of \$7.89 billion in the first seven months of 1985 compared with a surplus of \$700 million in the year-earlier pe-

riod, the official news agency Xin-hua reported Wednesday. Figures released by the Customs Bureau showed a trade volume from January through July of \$35.97 billion, comprising \$21.93

\$14.04 billion, it said.

It said, however, that exports in July rose by 2.5 percent, to \$2.22 billion, helping to reduce the trade deficit.

"The month's total foreign trade volume came to \$5.67 billion, 29.9 percent more than for July 1984," it

Imports rose by 58 percent, to \$3.45 billion, leaving a July deficit of \$1.23 billion.

Xinhua said exports to Japan and the United States continued to drop in July, but increased to Hong Kong and Macao, the European Community and the Soviet Union. Exports to the six member states of the Association of Southeast

Asian Nations — Thailand, Malay-sia, Singapore, Indonesia, the Philippines and Brimei — increased by 63.9 percent over July of 1984 and to the Soviet Union by 63 percent. Most imports came from Japan, jumping 87 percent over last July, Xinhua said.

Leading imports during the month were refined sugar, logs, chemical fibers, wool, iron ore, soda ash, rolled steel and machinery, calculators, television sets, ra-dio-recorders and vehicles.

Export gains were registered for live poultry, grain, silk and crude oil, Xinhua said.

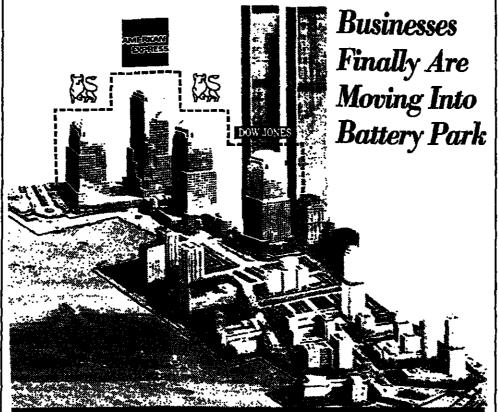

"Some goods whose import the country is controlling rose excessively," the news agency said. "Car and chassis imports rose 4.9 times from July 1984 and imports of calculators by 10 times," it added. (UPI, Reuters)

177 million square feet (about 10.9 million

square meters) of space, or the equivalent of nearly 20 World Trade Centers, are rising in the New York Times Service
NEW YORK — Before mammoth rejuvenation projects like Manhattan's Battery Park City ignited building booms and changed cityscapes in the nation's downtown areas, it seemed that a

24 largest U.S. markets.

To be sure, some developers worry about the overbuilding that already has inflated vacancy rates in Denver, Miami, Phoenix and elsewhere. But promoters say that the new downtown projects, if built on strong financial underpinning and accompanied by an upgrading of services.

may well prove to be the salvation of older cities.

Battery Park City, in the shadow of the World
Trade Center in lower Manhattan, is perhaps the
most ambitious multi-use urban project. Conceived in the late 1960s by Governor Nelson A. Rockefeller and a pet project of his three successors, it is a complex of residential and commercial buildings built on 92 acres (37.2 hectares) of landfill skirting the Hudson River. When it is completed in the next decade, its price tag is likely to be \$3 billion to \$4 billion.

Its commercial space, the World Financial Center, will house 30,000 office workers, with the first tenants scheduled to move in next month. Fueled by sharp growth in the financial services industry, which has created thousands of new jobs on Wall Street and stimulated demand for larger quarters, 90 percent of the World Financial Center's four glass and granite-sheathed sky-

scrapers already are rented.

On the residential side, Battery Park City's 14,000 apartments and condominiums will become home to 30,000 residents. The 1,700 apartments already constructed all are rented, with

lost its chance at a seat despite offering \$5 million. A Japanese firm, Utsumiya Securities Co., outbid the U.S. firm with a \$6.6-million offer.

Mr. Iwakuni said that Merrill Lynch, which is trying to set up a 24-hour world trading system through the exchanges in New York, London and Tokyo, would reapply for a seat as soon as possi-

Union Carbide Plans Layoffs, Stock Buyback

DANBURY, Connecticut -Union Carbide Corp. announced Wednesday that it will lay off 4,000 U.S. workers, sell some businesses, take a \$990-million pretax charge against 1985 earnings and use money from its employee pension fund to buy back as many as 10 million shares of its stock outstanding.

Union Carbide's chairman, Warren M. Anderson, said that the steps were among seven to be taken to enhance shareholder value and help the company achieve "new levels of safety and environmental protection

He said that the steps would result in a total charge of \$990 mil-lion against 1985 earnings, before taxes, and a reduction of about \$8 per share in after-tax earnings.

At midafternoon Wednesday Union Carbide stock was trading at \$54.75 a share on the New York Stock Exchange, unchanged on the

The company said that the layoffs would cover salaried employees in the United States, about 15

percent of the overall work force.

The moves by the company were seen by analysts as necessary in light of current economic conditions but precipitated by the threat of a takeover by GAF Corp., a specialty chemical company based in Wayne, New Jersey.

GAF announced Tuesday that it had increased its ownership in Union Carbide stock to 7.1 percent, saying it has considered "the possibility of a business combination between GAF and Union Car-

James M. Arenson, an analyst with Donaldson, Lufkin & Jenrette, said that Union Carbide's moves "should have been done years ago. These are things someover, would have done."

The phoenix-like rising of their collective new home is demonstrating that predictions of lower Manhattan's demise were unduly hasty - like forecasts for other downtowns across the United From Boston's "combat zone" to San Diego's Horton Center, through Chicago's Loop and Baltimore's Charles Center area, the buildozing and rebuilding of old downtown areas are pro-ceeding at a torrid pace. Bankers Concerned About Brazil

istry and central bank, specifically the loss of advocates of restrictive economic action sought by the International Monetary Fund, could complicate efforts by the country to refinance its \$103-billion foreign debt, bankers said Wednesday.

The reshuffle, which followed the resignation of the finance minister, Francisco Dornelles, marks a break with monetarist thinking favoring economic austerity as a means of curing Brazil's economic ills. For bankers it has created fresh uncertainty about containing the Latin American debt crisis.

Mr. Dornelles, who backed tougher action on government spending to bring down inflation, quit in disagreement over the prevailing government economic view favoring expansion. The central bank president, Antonio Carlos Lengruber, followed him out of

United Newspapers Bids £223 Million for Fleet

Compiled by Our Staff From Dispatches LONDON - United Newspapers PLC, which owns a chain of provincial newspapers, launched on Wednesday a £223-million (\$310-million) bid for the portion of Fleet Holdings PLC that it does Fleet's board quickly rejected

United's bid came one week after the Monopolies and Mergers Commission said that the proposed takeover would have no significant effect on newspaper competition. United owns about 20 percent of the shares in Fleet, which publishes the Daily Express, the Daily Star and the Sunday Express.

In addition to the Express national newspaper chain, Fleet's

Northwest Orders 3 Boeing 747-200s

೦ ಸಾ_{ತಿಗೆಕ}್ಷ

SEATTLE - Northwest Airlines, which operates one of the world's largest fleets of Boeing 747 jetliners, has ordered three more 747-200 jumbo jets, Boeing announced Tuesday.

The aircraft are scheduled for delivery in May and July 1986. The agreement is valued at \$270 milion. The purchase of the jumbo jets will increase Northwest's fleet of 747s to 38 aircraft.

Announced orders for 747s now stand at 650 aircraft worldwide, of which 619 have been delivered.

other interests include the Morgan Grampian magazine chain, a share of Reuters Holdings PLC and a 31percent interest in TV-AM.

United publishes the weekly humor magazine Punch as well as about 60 provincial newspapers, in-cluding the Yorkshire Post. It also publishes a number of special interest and trade magazines.

In rejecting the United bid, the Fleet board said the offer failed to recognize the company's strength, progress and prospects and it urged shareholders not to sell.

United shares closed Wednesday at 310 pence on the London Stock Exchange, up from 298 pence on Tuesday. Fleet Holdings finished at 362 pence, up from 345 pence. Based on Fleet's current share price, the company is valued at about £305.6 million.

Fleet bought the Express group in 1977 from Max Airken, son of Lord Beaverbrook, one of Britain's most powerful press barons. United has said that its board

believes that merging the two companies would create a well-diversified publishing group with greatly enhanced growth prospects. David R. Stevens, United's

chairman, said it appeared unlikely that any rival bid would be made as previous potential bidders had sold their interests.

Half of United's operating profit in 1984 came from the United States, where it owns trade and technical journals and the PR Newswire, a service that electronically distributes public relations (UPI, Reuters, AFP)

Bayer AG Profit Increased 16.1% In First Period

LEVERKUSEN, West Germany — Bayer AG, the giant chemicals company, said Wednesday that world group pretax profit rose 16.1 percent in the first half of 1985, fueled the interest of the percent of the first half of 1985, fueled the interest of the percent of the by increased foreign and domestic sales.

Profit was 1.73 billion Deut-sche marks (\$622 million) for the first six months of fiscal 1985 compared with 1.49 billion DM in the like 1984 period. Volume rose 12.2 percent to 24.59 billion DM.

Bayer said that pretax profit for the parent company rose 25.8 percent to 830 million DM in the first half and volume increased 8.9 percent to 9.41 billion DM.

Domestic sales for the parent company rose 5.6 percent in the first six months to 3.13 billion DM, while foreign sales grew by 10.7 percent to 6.28 billion DM. Exports accounted for 66.7 percent of parent company

A letter to shareholders said that in the second 1985 quarter the rates of parent company domestic and export volume rose from the first quarter.

Analysts Say Cancellation Of Divad Will Not Hurt Ford

By Susan Pastor New York Times Service
DETROIT — The U.S. Defense

Department's cancellation of the \$4.8-billion Divad anti-aircraft gun project will have little impact on the earnings of Ford Motor Co.

industry analysis say.

The gun, also known as the Sergeant York, was being developed by Ford Aerospace & Communication, that is tions Corp., a subsidiary that is primarily involved in military systems, satellite communications and space-mission support.

A spokesman for Ford Aerospace said the cancellation, announced Tuesday by Defense Sec-retary Caspar W. Weinberger, would affect about 1,900 workers on the project, based in Newport Beach, California. Ford hopes to find other jobs for many of the employees, the spokesman said. Total employment at Ford Aero-space is about 15,000.

Ford does not release financial results of individual divisions or subsidiaries. In 1984, the company's nonautomotive operations, which include the aerospace division and units that make glass and steel, had losses of \$24 million, while the automotive sector had operating income of \$3.4 billion. Revenues of the nonautomotive sector in 1984 were \$3.8 billion.

compared with \$48.5 billion for its automotive sector. Ford Aerospace received contract awards totaling \$1.5 billion in 1984, the spokesman

"There are bound to be some employment repercussions at Ford Aerospace, but relative to the Ford Motor Co. it's immaterial," said Harvey E. Heinbach, an automobile industry analyst with Merrill Lynch, Pierce, Fenner & Smith Inc. He said Ford's program of offering low-rate financing to car buyers would probably be more costly to the company than the loss of the

Divad project. Wolfgang H. Demisch, a defense-industry analyst with First Boston Corp., said the decision was a painful blow to Ford Aerospace." But he, too, said the impact on the entire company would be

■ Bofors Foresees Disruption Bofors AB said the cancellation by the United States of the anti-aircraft gun would disrupt its producuon and sales plans, Reuters re-ported from Stockholm.

Per Mossberg, a company spokesman, said the cancellation of the project, to which Bofors was delivering gun components, meant that Bofors would have to transfer workers to other tasks within the

Crocker Calls U.S. Penalty Result of 'Honest Mistake'

The Associated Press

SAN FRANCISCO - Crocker National Bank's failure to report about \$4 billion in cash transactions involving Hong Kong and Mexican border banks was "an honest mistake," a bank official said. A U.S. Treasury official said that it was likely that part of the money involved in the transactions came from drug deals.

There was every reason to believe the transactions of currency were not out of the ordinary," Harold P. Reichwald, the general counsel and executive vice president of Crocker, said Tuesday. The bank's parent company, Crocker National Corp., is owned by Mid-

land Bank PLC of London.

Earlier Tuesday, the U.S. Treasury Department had announced imposition of a record \$2.25-million fine against Crocker for 7.877 reporting violations from 1980 to 1985. Mr. Reichwald said the

money represented a settlement rather than a fine. "It was a mistake, an honest mistake," said Mr. Reichwald, adding that the problems came at a time when deregulation had thrown the banking industry into "nurmoil" and new reporting laws were enacted

regarding cash transactions.

Banks are required by the U.S. Bank Secrecy Act to report all cash transactions above \$10,000 as part of a federal effort to give investigators a tool for tracing drug deals and other corruption

"Although there is no evidence that the bank itself deliberately engaged in money laundering, Crocker's reporting failures were systemic and pervasive," said Assistant Treasury Secretary John M. Walker Jr.

There was a high likelihood that Crocker's violations involving money deposited through banks in Hong Kong and in Calexico and San Ysidro, along California's Mexican border, came from drug deals, Mr. Walker said. That comment "certainly borders on inflammatory," Mr. Reichwald said.

He added that some of the transactions may have involved transfers from Hong Kong businesses and individuals concerned about the future of Hong Kong after 1997, when China regains control of the

Texas Air Vetoes Accord to Nullify TWA Merger Pact

New York Times Service NEW YORK - Texas Air Corp. has decided not to go along with a plan under which it was to withdraw its merger agreement with Trans World Airlines, sources close to the negotiations said Tuesday.

Withdrawal would have enabled Carl C. leahn to take control of TWA sooner, but one of the sources said that the breakdown would not greatly hinder Mr. Icahn from appointing his own board and taking the airline private.

The source, who asked not to be identified, said that Texas Air lawyers were drawing up the agree-ment when Frank A. Lorenzo, the company's president, apparently changed his mind.

Under the agreement, Texas Air and its financier, Drexel Burnham Lambert Inc., would have split about \$42 million, including \$18 million TWA for breaking the merger agreement. The rest of the profits were to come from stock holdings and options.

Mr. Icahn could not be reached for comment. A spokesman for TWA said the airline had no comment

For its part, Texas Air said that it had been negotiating with Mr. Icahn and TWA but that no agreement had been reached.

COMPANY NOTES

Air Florida intends to reorganize under a new name. The business would operate as a subsidiary of a holding company called Jet Florida System Inc. Air Florida, which filed for protection from creditors in July 1984 with more than \$220 million in debts, has been flying as

Increased 8.4% In July

The Associated Press

-LONDON — Oil production from the British sector of the North Sea rose 8.4 percent in July but remained below record levels, the Royal Bank of Scotland reported Wednesday.

Production in July averaged 2.45 million barrels a day, up from 2.26 million barrels in June. In late automn, when the summer maintenance season is over, production is likely to move back toward the record level of 2.8 million barrels a day achieved in January, the bank said in releasing its monthly index of North Sea oil production.

Most of the mineral resources of the People's Republic of Benin have never been disturbed from their original deposits. These resources include - at a minimum - petroleum, iron ore, gold, phosphates, gypsum, lignite and limestone.

Now, the government of Benin is moving to shift land and sea to uncover these

KEY FACTS

ÖNBENIN

minerals for the benefit of the country's people.

Benin announces a \$2 billion joint-venture agreement with PANOCO of Switzerland. After careful evaluation of Benin's future needs, the government has drawn up a plan for rapid resources development. Benin has entered into agree-Land area: miles
43,484 square miles ment with PANOCO (Pan Ocean Oil Co., Inc.), headquartered in Geneva, as its Mineral resources joint-venture partner for rapid implementation of the plan.

Petroleum, gold, sum, phosphates, limestone lignite and limestone PANOCO was selected because it is a financially solid, privately owned company operating out of neutral Switzerland. And PANOCO has had successful experience with similar operations in neighboring

countries. PANOCO's first project will be increasing pro-

duction of Benin's offshore Sèmè Oil Field to a figure in excess of 25,000 barrels of crude per

Benin's goal is to achieve a significant increase in the standard of living for its people over the next decade. To do this, the government plans a coordinated drive to take advantage of all Benin's mineral resources. Concurrently, the country's infrastructure will be improved at a realistic pace, and in line with priority needs.

The first step in this long-range plan is cooperation with PANOCO to fully develop and exploit returns from the Sèmè field.

The projects involve: • Full development at the Sèmè

field. Construction of refineries,

roads, power-generation facili-

ties, and commercial and residential structures. Building fertilizer plants, hydroelectric dams and power stations, and irrigation systems

for agriculture. Commissioning a new international airport.

 Continued exploration and evaluation programs for offshore and onshore hydrocarbons, as well as commercial deposits of other mineral resources throughout the country.

The People's Republic of Benin (formerly Dahomey) gained independence from France in 1960. The current government came to power in 1972, and the country received its present name, "République Populaire du Bénin" in 1975.

Only 15% of Benin's arable land is currently under cultivation - yet agriculture contributes 45% of the GNP. The government's plan includes increasing agricultural efficiency as a basic requirement for the country's future development. Agriculture has vast potential for Benin.

Benin's capital is Porto Novo, but the administrative center is Cotonou. There is an inter national airport at Cotonou offering daily

direct flights to Europe, and connections to the major West African countries. Port facilities at

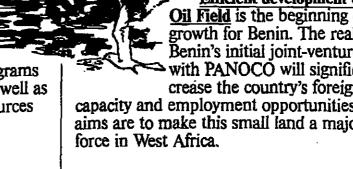

Cotonou have recently been improved to handle cargo transit of 1.2 million tons per year.

A satellite telecommunications center went on line in 1983, assuring reliable telephone and telex links with the rest of the world.

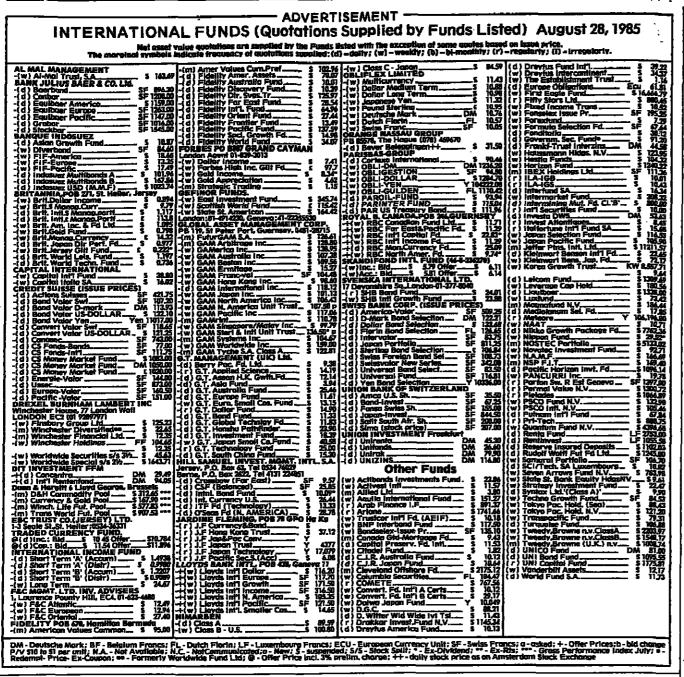

Efficient development of the Seme Oil Field is the beginning of sustained growth for Benin. The realization of Benin's initial joint-venture program with PANOCO will significantly increase the country's foreign trading

capacity and employment opportunities. Long-term aims are to make this small land a major economic force in West Africa.

> République Populaire du Bénin

INTERNATIONAL POSITIONS

RETIRED **EXECUTIVES** PROJECT MANAGEMENT

A major U.S. consumer products company with operations and projects around the world has need for Executives with proven results to direct significant projects on a consulting or temporary basis. Off-shore experience is required and language fluency (in addition to English) is desirable.

Dollar Eases Lower in European Trading

LONDON - The dollar declined slightly in treudless foreign exchange trading in Europe Wednesday. Currency dealers said they expected no large changes in the dollar's value in advance of Friday's release of U.S. economic figures for July,

1eckin

Japan Output Increases $\bar{1}.3\%$

TOKYO - Japan's seasonal ly adjusted industrial production index rose 1.3 percent in July from June, when it slipped 2 percent, the Ministry of International Trade and Industry said Wednesday.

The preliminary figures showed that the unadjusted July index rose 4.8 percent from June and 5.8 percent from July

The adjusted July producers shipment index increased 1.6 percent from June, when it was down 2.2 percent from May. Unadjusted, the producers shipment index was up 4.4 percent from July 1984 after a 3.5percent year-to-year gain in June. The preliminary index of producers' inventories of finished goods, seasonally adjusted, rose 0.1 percent in July after a 1.4-percent increase in May.

about to take place in the U.S. Manhattan structures are fearful of economy, so they gear up and buy cyclicals and companies highly le-veraged to the business cycle. Then we get a period when people decide the U.S. economy is not improving and become convinced it is actually declining. We've been through such two-steps since this business cycle City will be underutilized until the began in 1982, and it looks like we city's more basic problem's, like

are about to conclude another." His bet is that the economy will "muddle through" well into 1986, leading to a "muddling-through stock market." He called insurance stocks the best sector in the economy. president, predicts that by the time the project's bonds are retired in 2014, Battery Park City will earn a profit for the state of \$3 billion from leases on the land and payments-in-lieu-of-taxes. New York City also stands to gain handsomely. It has the option to take title to the land for \$1 after the bonds are

retired. But the financial outcome for Olympia & York remains uncer-tain. The company, which operates in 11 other North American cities as well as in Belgium, Britain and France, plunged courageously into the New York market in 1977 during the depths of the city's fiscal despair,

But Battery Park City, from the start, has been a major financial challenge. Built on speculation, without a single tenant signed up in advance, most of the World Financial Center has been financed by banks, including Manufacturers Hanover, Bankers Trust, the Bank of Montreal and the Sumitomo Bank. But the last two towers, the ones Merrill Lynch will occupy, were financed with \$500 million borrowed in the volatile commercial paper market.

Real estate experts say Olympia & York's short-term financing could place the company in a predicament similar to the one that faced the real estate investment trusts in the 1970s when those trusts were devastated by steeply rising interest rates. Developers usually finance construction proiects with bank loans and get longterm financing from insurance companies or pension funds when the project is built.

Yet Olympia & York now is sitting on dozens of floors of unleased office space in three older buildings in the financial district that it bought from Merrill Lynch, City Investing Co. and American Express to entice them into leases in the World Financial Center.

Those holdings could pose a real problem now. According to Office Network, the office vacancy rate in lower Manhattan reached 8.3 perthan the national downtown rate of 13 percent, it is up from 8 percent significantly higher than the 6.6percent rate in midtown Manhat-(AP, Reuters) ian in July.

TRIO: Portrait of an Intimate Friendship

By Aram Saroyan. 256 pages. \$15.95. Linden Press/Simon & Schuster, 1230 Avenue of the Americas, New York, N.Y.

Reviewed by Christopher Schemering

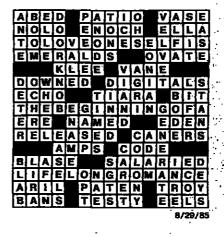

TRIO," the story of the lifelong friendship of Oona Chaplin, Carol Matthau and Gloria Vanderbilt, is an exasperating demonstration of how to turn a silk purse into a sow's ear. Think of it: Engene O'Neill's daughter, who married Charlie Chaplin; the rags-to-riches lass who married William Saroyan (twice) and later Walter Matthau; and the poor little rich girl herself, who married Leopold Stokowski and three others — these three women formed an intimate circle — charmed, I'm sure — that spanned five decades and was the toast of American high society. You can't lose with their story. Or can you?

Truman Capote was notoriously successful in using the hilarious luncheon conversation between Carol Matthan and Gloria Vanderbilt as the taking-off point for barely fictionalized tales of the rich and famous in "La Côte Basque, 1965." In this infamous short story the best of the published parts of the unfin-ished "Answered Prayers" — Capote saw Matthau and Vanderbilt as "charmingly incompetent adventuresses" who were so far into the trappings of American royalty that only their fast sass and unwavering loyalty to each other kept them sane.

Aram Saroyan, the son of Carol Matthau and William Saroyan and author of the memoir "Last Rites," probably wanted to ring a variation on the Capote theme, picturing the women as madcap heiresses — the kind Katharine Hepburn used to play in the 1930s — without turning the trio into Capote-like sacred monsters. Instead, the diplomatic, lighthearted Saroyan ends up killing his mother and her friends with kindness. Presented as a series of short vignettes and discreet conversation pieces, like postcards from the past, "Trio" traces memories of the three women from 1941 to the present, through marriages, divorces (not their fault) and spouses' deaths. That's a lot of ground to cover, and by the end the perplexed reader tright well feel cheated by Saroyan's elliptical style.

"Trio" leaves nothing but questions. Do the

Solution to Previous Puzzle

women think it is a coincidence that they married men much older and more famous than themselves? Why didn't Gloria Vandetbilt ever speak to her friends about her custody bilt ever speak to her friends about her customy battle? (Didn't they ever ask?) Why is William Saroyan presented as "The Phantom of the Opera" while Carol Matthan seems to be playing in "The Passion of Joan of Arc"? (What was their problem?) Why did Vanderbilt's marriages fail? (Did she ever confess to friends, "They married 'Gloria Vanderbilt' and yest marriages fail? (Did she ever contess to riterins, "They married 'Gloria Vanderbilt' and got me"?) Why is Carol Matthan described constantly as "witty" when she says nothing funny in 256 pages? (One has to read "La Côte Basque, 1965" for examples of Matthan's humor.) If Carol Marthau suspected that Vanderbilt was condescending toward Carol's mar-riage to Walter Matthau, how did Carol feel about Gloria's marriage to the then-lowly TV director Sidney Lumet? How bad is Oona Chaplin's self-imposed exile since her his band's death, and what are her best friends, Carol and Gloria, doing about it?

Aram Saroyan instead offers the trivial: a 20-page description of the time Oona and Carol were stood up at a Brown University foot-ball game (life as the school of hard knocks); Capote peeping through a transom at a mide Carol: Kenneth Tynan's elaborate pursuit of Carol ("I find you divinely beautiful and witty, and I want to marry you"); Gloria and Carol's amazement at one of their California parties "setting some kind of local record" (smart Gloria had spiked the punch).

The women's conversations are cluttered with such inanities as "I mean the way [Gloria] with such inantites as "I mean the way to story loves you makes me love her" and — constantive — "You are so divinely beautiful," to which the response is invariably, "Oh sweetheart, please. You're the beauty." We find that Walter Matthau calls Carol "pussycat," that Carol and Gloria call each other "sweetheart" (27) times) and that everybody calls everybody else "darling" (108 times; it's the Manhattan man-ira). When a young man tells Carol, "You only like famous people," Carol's retort is, "They're all terrific, and you stink." After she sticks out her tongue at him, the young man moves on, "definitely out of his depth."

None of this is used for a saturical effect. If the tone had been lightly self-mocking, the women might have come off less cloyingly vain and artificial. And Aram Saroyan's unwillingness to get into anything potentially unpleasant turns the trio into something not recognizably human. (You've heard about being out of your league, but out of your species?) The "gossip" here is hardly news: Gloria taking LSD under a doctor's care, a depressed Carol collecting sleeping pills, Oona fighting off J. D. Salinger—ell of these have been written about before with much more authority and before with much more authority and poig-

The women tell each other constantly how much their friendship means to them; the problem is that the author fails to dramatize it in any realistic or cohesive way. Friendship is much more than brushing checkbones in greeting. Intimate, long relationships involve mess, humor, irrational loyalty, and a perverse enjoy-ment of one another's naughty habits. In "Trio," the rich are different from you and me: They're just plain dull, darling.

Christopher Schemering, author of the forthcoming "Soap Opera Encyclopedia," review for The Washington Post.

McEnroe Survives Scare By Glickstein in Opener

By John Feinstein ington Post Service NEW YORK - When John McEnroe walked onto the stadium

court at the U.S. Tennis Center on Tuesday, his mood was sanguine. "I felt as good coming in here as I've ever felt," he said. "I just couldn't believe how flat I was out there." He was out there for 3 hours and 50 minutes, and had the wits scared out of him by Shlomo Glickstem or issue.

ranked player.

McEnroe fins stein of Israel, the world's 175th-

McEnroe finally won, 6-1, 6-7 (3-7), 2-6, 6-3, 7-6 (9-7), in a first-round encounter that had the kind of emotional twists and turns usually reserved for the final weekend. The guy played an unbelievable

U.S. OPEN TENNIS match," McEnroe said. "I mean, he played a hell of a match ... I was

in shock out there. When I went down two sets to one, I realized I could definitely lose." Had he lost, McEnroe would have been the first defending champion beaten in the first round of the U.S. Open. As it was, his brush with elimination was the

highlight of an otherwise routine I first day in which eight men's seeds and eight women's seeds advanced. Among the men, third-seeded Mats Wilander, sixth-seeded Anders Jarryd, No. 8 Boris Becker, No. 10 Joakim Nystrom, No. 12 Johan Kriek, No. 13 Tim Mayotte and No. 16 Tomas Smid were all straight-set winners. On the women's side, No. 3 Hana Mandlikova and No. 5 Claudia Kohde-Kilsch

led the advance into round two. None had to work as hard or as long as No. 1, McEnroe. None walked off the court and said with a deep sigh. "I've never been so happy to win a first-round match in my

Two years ago, McEnroe had to go five sets to get through the first round here against Trey Waltke. But in that match he didn't go up a break twice in the final set and Il Lifethin 'vootch the lead; he didn't have to serve twice to stay in the match; he whipped a backhand return past didn't have to play a last-set tie him. Still, Glickstein saved a fourth

breaker, and he didn't blow four match points before surviving. It did not start as a day when McEnroe would have to dig deep to 8-7 lead. Once more Glickstein pull out a victory. He recied off the served. McEnroe crushed a backfirst five games, and when Glick-stein finally won one, the crowd stein ran the ball down, but his

gave him a rousing mock cheer. But the tenor changed in the second set when Glickstein took the "You have to give the guy credoud set when Glickstein took the "Tou have to give the guy credoud."

tie breaker. He dominated the third set by breaking McEnroe twice. Glickstein, who is 27 and has been ranked as high as No. 33 in the world, remained impassive even as he came closer and closer to what would have been the most stunning moment of his career. He just kept running down balls, kept McEnroe off balance and kept placidly walking back to the base-

line after each point, win or lose. "I wanted to make sure I got his serve into play, at least make him volley on every point," Glickstein said. "I didn't want to give him any free points. The strategy worked almost 100 percent.

Almost. McEnroe broke early in the fourth set and evened the match almost routinely. And when he broke in the third game of the last set, it looked as if Glickstein's moment had passed.

But he broke back to tie the set at 3-3 when McEnroe netted a forehand after a spectacular rally. McEnroe broke right back, and Glickstein returned the favor - at love. Glickstein quickly held to lead, 5-4, and when he slammed a backhand return at McEnroe's feet, it was 15-30 in the 10th game. McEnroe was two points from de-

McEnroe searched the cloudy sky, took a deep breath and came up with three straight serves when he had to have them. Two were winners, one an ace; 5-all.

Each then held serve easily and they went to the tie breaker. McEn-roe quickly led, 3-1, but Glickstein rallied to 3-3 before McEnroe hit three superb points to lead, 6-3. He had three match points.

McEnroe got a first serve in, but Glickstein calmly drove a back-band at McEnroe's feet. McEnroe scooped the volley into the net. McEnroe served again. This time, Glickstein landed a lob just inside the line and McEnroe netted a forehand. Glickstein served, McEnroe netted the serve. It was 6-6.

Glickstein, preparing to serve, was disconcerted by a yell from the crowd. A moment later, McEnroe match point with another superb backhand return. McEnroe finally twisted a serve for a winner and an backhand clicked into the net

College Football's Upstarts Continue Their Challenge

old guard finally resist the newcomers? Not since Alabama did it in 1978-79 has any school captured consecutive na-

tional championships. The last five ti-thists have all been first-timers. And while Georgia (1980), Clemson (1981) and Penn State (1982) were familiar names in winning circles, Miami (1983) and Brigham Young (1984) were relative newcorners to the sport's top echelon. Can it happen again?

Eleven teams from last year's final Associated Press top 20 have never won a national title. With their 1984 finish in parentheses, they are Washington (9), Florida (3), Boston College (5), Oklaho-ma State (7), Southern Methodist (8), UCLA (9), South Carolina (11), Iowa (16), Florida State (17), Kentucky (19)

Brigham Young, which will open against Boston College in the Kickoff Classic on Thursday night, will continue to throw the ball, mainly from quarter-back Robbie Bosco to wide receiver Glen Kozlowski, but the offensive line was hit hard by graduation. Only four starters return on defense, three of them line-

BYU (13-0) was 1984's only undefeated major-college team. It has a 24-game winning streak, the country's longest, and is favored to win its 10th consecutive Western Athletic Conference crown. The team relies on senior Bosco, who

edged BC's departed Doug Flutie in total offense per game last season (327.7 yards to 327.5). Bosco completed 62 percent of his passes for 3,875 yards and 33 touchdowns. But, he has said, "As many times as we throw the ball and as many defenses as we see. . . I still get confused."

Pacific 10 members Washington, UCLA and Southern Cal won major bowl games on Jan. 1 and finished in the top 10. The conference could have a wild scramble among those three, plus Arizona, Arizona State and Washington State.

Southern Cal was last year's conference champion, and Coach Ted Tollner says the Trojans "want to continue to improve, be one notch better — we'd like to get back to the Rose Bowl." The probable key is quarterback Sean Salisbury. who tore knee cartilage in second game of 1984 and missed the rest of the season.

Washington's only loss was to South-ern Cal. The Huskies return five starters from a defense that led the nation with a total of 51 interceptions and fumble recoveries. Senior Hugh Millen is an experienced quarterback. UCLA is without a seasoned signal-

caller, but its returnees are all-American placekicker John Lee and sophomore tailback Gaston Green, who rushed for 144 yards in the Fiesta Bowl. Washington

State will field one of the nation's best NEW YORK - Can college football's backfields - quarterback Mark Rypien and tailback Rueben Mayes were allconference in 1984 and fullback Kerry Porter, out most of last year with an injury, made it in 1983. EAST

At the other end of the country, Boston College will try to remain in the rankings Penn State (6-5 in 1984) has 18 of its straight bowl trip, West Virginia is look-top 22 defensive players back, including ing to its defense, where 10 starters recight starters led by strong safety Michael Zordiek. The offeren same with the said from safety Towie chael Zordich. The offense returns six starters, among them running back D. J. Dozier, but will have a new quarterback, probably junior Matt Knizner.

The main goals at Pittsburgh (3-7-1) are to replace linebackers Troy Benson

COLLEGE FOOTBALL PREVIEW

despite the loss to the pros of Flutie, major-college football's all-time passing king. Shawn Halloran, Flutie's backup for two seasons, is a dropback passer who can't scramble like Flutie. But who can?

and Caesar Aldisert and pump life into an offense that sagged last season. Quarterback John Congemi, plagued by injuries last year, is back.

Brigham Young quarterback Robbie Bosco: 'As many times as we throw the ball and as many defenses as we see. . . . I still get confused.'

Atterican League
CALIFORNIA—Placed Alan Fowlkes,
sticher, on the 15-day disabled list,
OAKLAND—Activated Carney Lansford.

OAKLAND—Activates Larrey Lansard. filtrid baseman. Optioned Steve Kipfer, Infield-er, to Tocoma of Pacific Coast League. National League PHILADELPHIA—Recailed Fred Toliver, pitcher, from Detwer of the American Association to complete an earlier trade with the Company Meet.

iensive end. Wolved Guy Frazier, finebacker: Gary Smith, event; Antheny Tuggie, defen-sive bock; Eric Stokes, tackle-center; Kim Lockin, runnine bock; Harold Stanfield, fishif end, and Keith Cruise, detensive end. Placed John Fariev, running back, on the injured

CLEVELAND-Waived Dick Ambrase. Dovid Marshall, linebackers; Shone Swanson, wide receiver-sunt returner, and Jon Craver, turn, including linebackers Matt Smith and Fred Smalls and free safety Travis

The best quarterback in the East may be Bill Byrne at Navy. With Byrne, the return of halfback Napoleon McCallum and the other offensive standouts, the Middies will be solid but they again face a difficult schedule.

Syracuse could contend for regional honors if it comes up with some offense (defensive tackle Tim Green is a candidate for the Outland Trophy, which goes to the country's best interior lineman). SOUTH

Aubura was the preseason No. 1 team a year ago, but the Tigers lost their first two games to Miami and Texas. If tailback Bo Jackson stays healthy, they should contend for the Southeastern Conference championship. Coach Pat Dye has instituted an I-formation offense so Jackson can carry the ball more often.

Auburn's most serious challenge should come from Florida, which is on probation and barred from television appearances and bowl games but not from winning. Florida won its last eight games of 1984 and might keep on winning with Kerwin Bell returning at quarterback and running backs Neal Anderson and John

Louisiana State, Tennessee and possi-bly even a comeback by Alahama should keep the SEC the strongest league in college football.

In the Atlantic Coast Conference, Maryland has 18 starters back, including two all-ACC defenders — guard Bruce Mesner and back Al Covington. In all, Maryland has 57 players (49 of them lettermen) from last season, when the team won its last seven games and scored more than 40 points in five of them.

With Clemson coming off probation and picked to finish second, the ACC will have eight teams officially in the race for the first time since 1970. Georgia Tech and Virginia are expected to nail down the other two first division spots.

Miami is coming off an 8-5 season that could easily have been 11-2. The Hurricanes have nine defensive starters back but lost quarterback Bernie Kosar to the pros. Not to worry -- Vinny Testaverde has a better arm. Florida State must rebuild its secondary and settle on a quarterback. South Carolina has the entire offensive backfield from last year's 10-2 team, the best in school history. **MIDWEST**

This is the year of the quarterback. Big Ten and Steve Beuerlein will be back at Notre Dame.

"It'll be fun to watch," says Mike White, the coach at Illinois, of the Big Ten's shift toward wide-open football. "There are more offensive skills and tal-

ning backs than you will see anywhere. The offenses will be explosive.

Among the quarterbacks are Iowa's Chuck Long, Jack Trudeau of Illinois and Purdue's Jim Everett. Trudeau will throw to all-American David Williams. who caught 101 passes last year.
Only Ohio State lost its quarterback,

but the Buckeyes have backup Jim Karsatos, a better passer than 1984 starter Mike Tomczak. The Buckeyes also return eight defensive starters. And tailback Keith Byars was the nation's leading

Besides Long, Iowa gets running back Ronnie Harmon back from a leg injury. Larry Station was an all-American line-

Oklahoma and Nebraska are 1-2 in the Big Eight poll, but Oklahoma State could make it a three-team race. The Cowboys were 10-2 a year ago — losing only to Oklahoma and Nebraska.

Oklahoma should have one of the nation's stingiest defenses, led by nose guard Tony Casillas, end Kevin Murphy and linebacker Brian Bosworth. On offense, Coach Barry Switzer says new quarterback Troy Aikman is the best

passer be's ever had. Only four starters return to Nebraska. but the Cornhusker program always provides adequate replacements. "Maybe it's not quite as bad as it looks," says Coach Tom Osborne. "I think we'll line up six or seven who have started at one time or another." They include Doug DuBose, the Big Eight's leading rusher, and line-

backers Mike Knox and Marc Munford. Oklahoma State's top hands include all-America defensive lineman Leslie O'Neal and sophomore tailback Thurman Thomas, who was the Big Eight's offensive newcomer of the year. SOUTHWEST

The Southwest Conference had its tightest race in 70 years last season and six teams are given a legitimate shot at the title. Only Texas Tech and Rice are not considered contenders while Southern Methodist, hit by the harshest probation is NCAA history, is not eligible.

But SMU could be one of the best teams in the nation. Quarterback Don King and tailbacks Reggie Dupard and Jeff Atkins return to lead an offense that averaged 396 yards a game. Arkansas returns nine starters on defense.

Houston, which represented the conference in the Cotton Bowl, returns exciting veer quarterback Gerald Landry; tackle T.J. Turner will anchor a respectable defensive unit.

Texas A&M closed out 1984 by Nine starting quarterbacks return in the trouncing TCU and Texas. The Aggies are strong at quarterback, where Craig Stump and Kevin Murray can produce instant excitement. Baylor also has two classy quarterbacks in Tom Muecke and Cody Carlson. Texas has overcome

inconsistent quarterbacking. (AP, NYT)

John Helps A's Blank Yankees

led by Our Staff From Dis OAKLAND, California -Tommy John had his sinker working Tuesday night and grounded the New York Yankees deeper into the American League's Eastern Di-

vision standings.

John, 42 and a one-time Yankee, allowed three hits over seven innings in Oakland's 3-0 victory over

BASEBALL ROUNDUP

New York. "It's my best game by far this season," he said. "I've been in the majors for 21 years and I'm still trying to get better. I have a lot of pride in being a major-league baseball player."

John, who was released by the California Angels in June, turned in a throwback performance of offspeed pitching; he recorded 11 groundouts. The loss was New York's second straight and dropped the Yankees five games behind division-leading Toronto.

Ten years ago, left-hander John was temporarily out of baseball, having his pitching arm surgically rebuilt. Referring to his 1979-1982 tenure with the Yankess, John said, "I'm about 10 pounds lighter and a tew years older. He added: "But I still throw the same pitches."

"I had a lot of soul-searching to do after I was released," he said. "It would have been easy to have gone home, been a father, got my money from the Angels and played golf. But I wanted to pitch, and the A's wanted me." John is 2-1 for Oakslifetime record is 259-202.

Blue Javs 8 land and 4-5 overall this year. His

Blue Jays 8, Twins 0: In Minneapolis, Jeff Burroughs drove in three runs with a single and a double and Steve Davis, a rookie who had already won 20 games in the minors this season, pitched four innings of one-hit rehef to win his

BETHLEHEM POSTCARD

Steel City's Musical Hope

By Lindsey Gruson ETHLEHEM, Pennsylvania ---BETHLEHEM, Pennsylvania— While sneaking through the thick black oak and hemlock forests for a surprise attack on the settlement of Bethlehem in 1755, maranding Indians were panicked by an unearthly sound: the Moravian Trombone Choir announcing the annual Christmas festival. The brassy tunes resounding through the woods convinced the Indians that a great spirit was protecting the settlement, and they fled.

Since its founding in 1741 by Moravian missionaries, music has protected, nurtured and given an identity to Bethlehem, which straddles the Lehigh River. "We listened to very line music in the church." Benjamin Franklin wrote to his wife during a 1756 visit. "Flutes, oboes, French horns and trumpets do accompany the organ.

Now the city that steel put on the industrial map is hoping that music will again make it a haven, this time from the economic ravages that have brought other cities in the region to their knees.

In Musikfest, a nine-day celebration of its musical heritage, the city becomes a giant stage. From noon until nearly midnight, music fills the air, heralding what city officials say is the birth of a new industry in Bethlehem.

"The key issue is economic development," said John W. Trotter, vice president of the Bank of Meridian and chairman of the festival This has been a one-industry town since the industrialization of America. But we're replacing the steel industry with a cultural tourism in-

Jeffrey A. Parks, a local lawyer and music buff, is credited with originating the idea of a festival 'It's a changeover from the industrial economy to a service economy," he said. "Bethlehem was here long before Bethlehem Steel and will be here long after Bethlehem Steel is gone. There's a lot of fasci-nating history that I'd like to ex-

The second annual Musikfest which ended Sunday, attracting more than 300,000 people to almost 450 free performances, from opera to com-pah-pah, and from balladeers to brass bands. To top it off, there is the city's renowned Bach

The festival gives the four-

square-block city center, one of the finest examples of colonial Germanic architecture, the flavor of an Ivy League campus at freshman orientation. Cars are barred and families dressed in shorts and Tshirts stroll along the streets. In small groups they visit Brethren House, which was the General Hospital of the Continental Army, and the Sun Inn, where Franklin, George and Martha Washington, John Adams, Lafayette and 17 members of the Continental Congress, among other notables, slept

during visits to Bethlehem. City officials plan to start marketing these and other historical attractions. They hope Musikfest will become the largest of a series of monthly tourist magnets, such as the annual Christmas festival of lights. They have started planning for a visitor center, a 300-room hotel and a convention center.

"People think of this as a dying steel town," James W. Kauffman, who moved to Bethlehem from Ohio four years ago, said at a con-cert by the folksinger Pete Seeger. "But the festival transforms it. It's a point of pride."

Once a gritty city of smoke-belching mills, coke plants and grimy streets. Bethlehem has suffered many of the hardships typical of cities that relied on heavy industries. It became a former steel center, a former transportation center. a former coal center, a former quarrying center, a former iron ore center. Unemployment climbed, and

discouraged young people left. Unlike many other steel cities, however, Bethlehem has attracted a number of new industries to the Lehigh Valley. The industrial park set up at the edge of town 26 years ago is nearly full. Nonetheless, the decline of what was once a mighty industrial center has shaken the

city's self-confidence. Seeger summed up the feeling when he opened his concert with "John Henry": "My daddy was steel-driving man," Seeger sang. "He laid down his hammer and he

Then, however, Seeger summarized the new feelings of hope with his next selection. When I first came to this land, I was not a wealthy man," he sang. "But the land was sweet and good and I did

Washington Post Service

SAN FRANCISCO — Five
years ago, with \$10,000 in grant money and a tiny crew of Íl-paid Asian-American actors, a 30-year-old Hong Kong immi-grant named Wayne Wang filmed an odd, loosely written mystery set in Chinatown. He used borrowed tripods, borrowed lights, a borrowed sound-mixing board and a rented camera that gave him only 10 days to shoot. He edited alone, nights and week-ends, in a tiny rented editing room behind a pornographic-movie studio. When his film looked finished, he went out to see about getting it shown to an audience or two.

The San Francisco film festival officials never looked at it. The Chicago film festival turned it down. Even Chinese theater owners stayed away, uneasy about its elliptical references to Chinatown politics.

Then two Manhattan festivals took Wang in. The 80-minute, black-and-white 16mm film, "Chan Is Missing," with its adlibbed lines and its off-kilter camera work and its actors who had never acted before, astonished

New York critics.

Wang, who had bought a cutrate ticket to New York and put up in a friend's Chinatown apartment, became an exceedingly hot item. Producers called him. Agents called him. People he hadn't heard from in 15 years called him. A distributor invited Wang to his office and watched Wang gaze at the photographs on the walls. Bertolucci. Godard.

"All the great art directors were up there. Kurosawa," Wang re-called. "And he said, you know, 'Do you want your picture up there with the rest of them? I'd like to distribute your movie.' And he's a nice person, and everything. So I said, 'Fine!'" Wang laughed, still delighted by the memory. His laugh is charming, his manner cordial.

His English is pure American, the traces of his Hong Kong British accent ground away by 18 years in the United States. He sits in an office sparsely furnished but placed firmly in the high-rent edges of central San Francisco. San Francisco When he went to New York last two cultures.

Director Wang: The "Dim Sum" landscape.

month for the pre-release screenings of his movie "Dim Sum." he got invitation-only screenings and interview availability" and a Manhattan hotel room, and Orion Pictures picked up the tab.

In "Chan is Missing," his camera invading restaurant kitchens community centers and ill-lighted one-room apartments, Wang used the device of an unsolved and prismlike search for a missing Chinese man to pull outsiders into the lives of immigrant and American-born Chinese.

His title was a mocking salute to Charlie Chan. His close was a scratchy rendition of "Grant Avenue," the painfully exuberant tourist anthem from "Flower Drum Song." He filmed a milk-swigging bilingual fry cook in a 'Samurai Night Fever' T-shirt, a serious graduate student explaining the intricacies of cross-cultural misunderstandings, a disaffected young Vietnam veteran whose epithet-studded jive came straight

"Dim Sum" focuses gently and with more precision on a small San Francisco family straddling

from Richard Pryor routines.

themselves perpetuated, too," he said, pointing to "the Bruce Lee heroic mythical figure." Wang grew up in Hong Kong, the younger of two sons of an

of infinite depth and complexity.

There were "so many stereotypes that actually Chinese movies

import-export businessman who kept close ties to the United States. The boys went to bilingual Catholic schools with the understanding that their university work would be in Britain or America. For Wayne Wang it was northern California, a junior college followed by a private art college in Oakland. At his first meal with the family

he lodged with, the main course was ox tongue with boiled potatoes and cabbage. The principal reaction Wang remembers was panic, but he ate the meal and set out with fervor to embrace the new land, Oakland's and San Francisco's Chinatowns were near where he lived, but he avoided them. He are a lot of hamburgers, and learned how make a tunamelt sandwich without burning the outside of the bread. "I was mentally prepared to almost say, 'I'm not Chinese.' " Four years later, married to a

Caucasian woman and thorough-ly immersed in California, Wang found himself spending time with the artists and community activists based in San Francisco's Chinatown. His principal work was painting, big abstract experi-ments in color and form, but he said he always knew film or television would claim him eventually. As he worked on film and slide studies of American images of Chinese men and women. began what he described as "a cycle where I went overboard to being Chinese."

He moved to a San Francisco apartment near Chinatown, with Chinese-American roommates (his marriage broke up). He bought Chinese-language newspapers and struggled to remember the characters he had forgotten. He worked in a Chinatown community center teaching immi-grants to speak English and make ense of the new culture.

His roommates and other American-born Chinese cooked dinners their parents had pre-

it. Not that the Chinese films of Wang's youth created characters loaf with salted fish. They worked in Chinatown. They spoke Chinese much of the time. They argued questions of identity, assimilation, ethnic loyalty. This was the community Wang wanted to describe in film.

A story began taking shape when a middle-aged Taiwanese immigrant vanished one day from the community center. In 1979, with an American Film Institute grant for a picture about taxi drivers, Wang set to work. The younger of his two drivers became the bitter, intriguing character of Steve — a "kind of

black-influenced younger charac-Wang said. Wang had watched the affectations being picked up by Chinese boys from some of the tougher high schools; he asked a local actor, Marc Hayashi, to play Steve that way. Wang was not particularly bothered by the fact that Hayashi's background is Japanese. Instinct seems to reign when Wang chooses his actors; Laureen Chew, the star of "Dim Sum," is a young Chinese-American woman whose sole acting experience was a small role in "Chan Is Missing." Much of the new picture was shot in Chew's house. Her movie mother, Tam, the matriarch battling for tradition, is also her real

mother, Kim Chew, who would occasionally hold up shooting to finish cooking dinner.

The other female lead in this movie, the elegant woman who announces with some irritation that all Chinese men care about after marriage is "their sons and which movies to Betamax," is a celebrated Hong Kong film actress and Wang's second wife, Cora Miao. They met when Wang asked her to appear in "Dim

Wang said he had wanted for years to direct an updated, culturally truer remake of "Flower Drum Song," Hollywood's one sweet but excruciatingly hokey treatment of the American-Chinese effort to reconcile tradition with the new land. Now he probably will be able to.

"I have a real love-hate relationship with that movie," he said with a broad grin. "I find the movie very corny and I have great laughs off it, and also parts of the movie are very moving to me."

PEOPLE

Lennon Limo, Ownership Disputed, Won't Be Sold A white Mercedes limousine

made for John Lemon in 1970 has been withdrawn from the ancient block because a member of the Supremes, Mary Wilson, claimed in court that it was hers, Susu Robinson, a spokeswoman for Sotheby's. said Wednesday that the limousine had been scheduled to be part of a sale of rock 'n' roll memorabilia Thursday in London. Sotheby's had estimated that it would bring £150,000 (about \$210,000). If was not revealed how ownership of the car came to be in dispute.

MGM-UA has tentatively agreed to add a disclaimer to its! "Year of the Dragon," a graphic movie about crime in New York's Chinatown that has been heavily criticized by Asian groups, the Los Angeles Times reported Wednesday. The disclaimer would be designed to deflect claims that the Michael Cimino film is racist. The Times said the wording had yet to be worked out. Asian-Americans have picketed "Year of the Dragon" since it opened Aug. 16; Robert
Daley, who wrote the book from
which the movie was adapted, sepported the protests, saying that
when he read the script taken from his novel, "I wanted to cry."

Lester Maddox jubilantly do clared in Marietta, Georgia, that tests showed he did not have acquired immune deficiency syndrome, despite his exposure to the AIDS virus at a cancer clinic in the Rahamas. The former Georgia governor, who is 69, was treated at the Immunology Researching Center for cancer of the prostate, which he said was now in remission. The center, closed in July by the Bahamian government, recommended macrobiotic diets and injectious of a blood-derived substance.

Harper's Bazaar magazine says Linda Evans and Catherine Oxen berg of the TV series "Dynasty" are among the 10 most beautiful wemen in the United States. Otherwomen named in the magazine Tout. 10 the singer Diana Ross, the mode Cheryl Tiegs, the TV personality Barbara Walters and the actresses Jaciya Smith, Isabella Rossellini, Molly Ringwald, Connie Sellecca and Rebecca De Mornay.
